Entrez GenelD	<u>80829</u>
Protein Accession#	<u>Q96JP5</u>
Gene Name	ZFP91
Gene Alias	FKSG11, PZF, ZNF757
Gene Description	zinc finger protein 91 homolog (mouse)
Gene Ontology	Hyperlink
Gene Summary	The protein encoded by this gene is a member of the zinc finger family of proteins. The gene prod uct contains C2H2 type domains, which are the classical zinc finger domains found in numerous n ucleic acid-binding proteins. A read-through transcript variant composed of ZFP91 and CNTF se quence has been identified, but it is thought to be non-coding. Read-through transcription of ZFP9 1 and CNTF has also been observed in mouse. A pseudogene has also been identified on chrom osome 2. [provided by RefSeq
