

OR4D5 polyclonal antibody

Catalog # PAB24379 Size 100 uL

Applications

Immunohistochemistry (Formalin/PFA-fixed paraffinembedded sections)

Immunohistochemical staining of human testis with OR4D5 polyclonal antibody (Cat # PAB24379) shows strong cytoplasmic positivity in Leydig cells at 1:200-1:500 dilution.

Specification	
Product Description	Rabbit polyclonal antibody raised against recombinant OR4D5.
Immunogen	Recombinant protein corresponding to amino acids of human OR4D5.
Sequence	RNKEVIMAMKKLWRRKKDPIGPLEHRPL
Host	Rabbit
Reactivity	Human
Form	Liquid
Purification	Antigen affinity purification
lsotype	lgG
Recommend Usage	Immunohistochemistry (1:200-1:500) The optimal working dilution should be determined by the end user.
Storage Buffer	In PBS, pH 7.2 (40% glycerol, 0.02% sodium azide)
Storage Instruction	Store at 4°C. For long term storage store at -20°C. Aliquot to avoid repeated freezing and thawing.

Product Information

Note

This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which shoul d be handled by trained staff only.

Applications

Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Immunohistochemical staining of human testis with OR4D5 polyclonal antibody (Cat # PAB24379) shows strong cytoplasmic positivity in Leydig cells at 1:200-1:500 dilution.

Gene Info — OR4D5	
Entrez GenelD	<u>219875</u>
Protein Accession#	<u>Q8NGN0</u>
Gene Name	OR4D5
Gene Alias	OR11-276
Gene Description	olfactory receptor, family 4, subfamily D, member 5
Gene Ontology	<u>Hyperlink</u>
Gene Summary	Olfactory receptors interact with odorant molecules in the nose, to initiate a neuronal response tha t triggers the perception of a smell. The olfactory receptor proteins are members of a large family of G-protein-coupled receptors (GPCR) arising from single coding-exon genes. Olfactory receptor s share a 7-transmembrane domain structure with many neurotransmitter and hormone receptors and are responsible for the recognition and G protein-mediated transduction of odorant signals. T he olfactory receptor gene family is the largest in the genome. The nomenclature assigned to the olfactory receptor genes and proteins for this organism is independent of other organisms.
