

# ADRB2 polyclonal antibody

Catalog # PAB24854      Size 100 uL

## Applications

### Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Immunohistochemical analysis of paraffin-embedded human brain tissue using ADRB2 polyclonal antibody (Cat # PAB24854).

## Specification

|                             |                                                                       |
|-----------------------------|-----------------------------------------------------------------------|
| <b>Product Description</b>  | Rabbit polyclonal antibody raised against synthetic peptide of ADRB2. |
| <b>Immunogen</b>            | A synthetic peptide corresponding to ADRB2.                           |
| <b>Host</b>                 | Rabbit                                                                |
| <b>Theoretical MW (kDa)</b> | 47                                                                    |
| <b>Reactivity</b>           | Human                                                                 |
| <b>Specificity</b>          | ADRB2 polyclonal antibody detects endogenous levels of ADRB2 protein. |
| <b>Form</b>                 | Liquid                                                                |
| <b>Purification</b>         | Antigen affinity purification                                         |
| <b>Concentration</b>        | 1 mg/mL                                                               |
| <b>Purity</b>               | > 95% by SDS-PAGE                                                     |

|                            |                                                                                                                                                                           |
|----------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Recommend Usage</b>     | Western Blot (1:500-1:1000)<br>Immunohistochemistry (1:50-1:200)<br>Immunofluorescence (1:50-1:200)<br>The optimal working dilution should be determined by the end user. |
| <b>Storage Buffer</b>      | In 1x PBS, pH 7.2 (0.05% sodium azide)                                                                                                                                    |
| <b>Storage Instruction</b> | Store at 4°C. For long term storage store at -20°C.<br>Aliquot to avoid repeated freezing and thawing.                                                                    |
| <b>Note</b>                | This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.                                                    |

## Applications

- Western Blot
- Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)  
Immunohistochemical analysis of paraffin-embedded human brain tissue using ADRB2 polyclonal antibody (Cat # PAB24854).
- Immunofluorescence

## Gene Info — ADRB2

|                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| <b>Gene Summary</b>     | This gene encodes beta-2-adrenergic receptor which is a member of the G protein-coupled receptor superfamily. This receptor is directly associated with one of its ultimate effectors, the class C L-type calcium channel Ca(V)1.2. This receptor-channel complex also contains a G protein, an adenylyl cyclase, cAMP-dependent kinase, and the counterbalancing phosphatase, PP2A. The assembly of the signaling complex provides a mechanism that ensures specific and rapid signaling by this G protein-coupled receptor. This gene is intronless. Different polymorphic forms, point mutations, and/or downregulation of this gene are associated with nocturnal asthma, obesity and type 2 diabetes. [provided by RefSeq] |
