

# DEFA3 polyclonal antibody

Catalog # PAB25148

Size 100 uL

## Applications

### Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Immunohistochemical analysis of paraffin-embedded human skeletal muscle tissue using DEFA3 polyclonal antibody (Cat # PAB25148).

## Specification

<b>Product Description</b>	Rabbit polyclonal antibody raised against synthetic peptide of DEFA3.
<b>Immunogen</b>	A synthetic peptide corresponding to DEFA3.
<b>Host</b>	Rabbit
<b>Reactivity</b>	Human
<b>Specificity</b>	DEFA3 polyclonal antibody detects endogenous levels of DEFA3 protein.
<b>Form</b>	Liquid
<b>Purification</b>	Affinity purification
<b>Concentration</b>	1 mg/mL
<b>Recommend Usage</b>	Immunohistochemistry (1:50-1:200) The optimal working dilution should be determined by the end user.
<b>Storage Buffer</b>	In PBS, pH 7.2 (0.05% sodium azide)
<b>Storage Instruction</b>	Store at 4°C. For long term storage store at -20°C. Aliquot to avoid repeated freezing and thawing.

<b>Note</b>	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

## Applications

- Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Immunohistochemical analysis of paraffin-embedded human skeletal muscle tissue using DEFA3 polyclonal antibody (Cat # PAB25148).

## Gene Info — DEFA3

<b>Entrez GeneID</b>	<a href="#">1668</a>
<b>Gene Name</b>	DEFA3
<b>Gene Alias</b>	DEF3, HNP-3, HNP3, HP-3
<b>Gene Description</b>	defensin, alpha 3, neutrophil-specific
<b>Omim ID</b>	<a href="#">604522</a>
<b>Gene Ontology</b>	<a href="#">Hyperlink</a>
<b>Gene Summary</b>	Defensins are a family of microbicidal and cytotoxic peptides thought to be involved in host defense. They are abundant in the granules of neutrophils and also found in the epithelia of mucosal surfaces such as those of the intestine, respiratory tract, urinary tract, and vagina. Members of the defensin family are highly similar in protein sequence and distinguished by a conserved cysteine motif. Several alpha defensin genes appear to be clustered on chromosome 8. The protein encoded by this gene, defensin, alpha 3, is found in the microbicidal granules of neutrophils and likely plays a role in phagocyte-mediated host defense. It differs from defensin, alpha 1 by only one amino acid. [provided by RefSeq]
<b>Other Designations</b>	defensin 3, neutrophil-specific defensin, alpha 3 neutrophil peptide 3
