

FAS polyclonal antibody

Catalog # PAB29420

Size 100 uL

Applications

Western Blot (Cell lysate)

Western blot analysis of Lane 1: Human cell line RT-4 Lane 2: Human cell line U-251MG sp Lane 3: Human plasma (IgG/HSA depleted) with FAS polyclonal antibody (Cat # PAB29420) at 1:100-1:250 dilution.

Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Immunohistochemical staining of human rectum with FAS polyclonal antibody (Cat # PAB29420) shows strong cytoplasmic and membranous positivity in glandular cells at 1:200-1:500 dilution.

Immunofluorescence

Immunofluorescent staining of human cell line A-431 with FAS polyclonal antibody (Cat # PAB29420) at 1-4 ug/mL concentration shows positivity in nucleus, plasma membrane and cytoplasm.

Specification

Product Description	Rabbit polyclonal antibody raised against recombinant human FAS.
Immunogen	Recombinant protein corresponding to human FAS.
Sequence	QVTDINSKGLELRKTVTTVETQNLEGLHHDGQFCHKPCPPGERKARDCTVNGDEPDCVPCQEG KEYTDKAH
Host	Rabbit
Reactivity	Human
Form	Liquid
Purification	Antigen affinity purification
Isotype	IgG
Recommend Usage	Immunohistochemistry (1:200-1:500) Immunofluorescence (1-4 ug/mL) Western Blot (1:100-1:250) The optimal working dilution should be determined by the end user.
Storage Buffer	In PBS, pH 7.2 (40% glycerol, 0.02% sodium azide)
Storage Instruction	Store at 4°C. For long term storage store at -20°C. Aliquot to avoid repeated freezing and thawing.
Note	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Applications

- Western Blot (Cell lysate)

Western blot analysis of Lane 1: Human cell line RT-4 Lane 2: Human cell line U-251MG sp Lane 3: Human plasma (IgG/HSA depleted) with FAS polyclonal antibody (Cat # PAB29420) at 1:100-1:250 dilution.

- Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Immunohistochemical staining of human rectum with FAS polyclonal antibody (Cat # PAB29420) shows strong cytoplasmic and membranous positivity in glandular cells at 1:200-1:500 dilution.

- Immunofluorescence

Immunofluorescent staining of human cell line A-431 with FAS polyclonal antibody (Cat # PAB29420) at 1-4 ug/mL concentration shows positivity in nucleus, plasma membrane and cytoplasm.

Gene Name FAS

Gene Alias ALPS1A, APO-1, APT1, CD95, FAS1, FASTM, TNFRSF6

Gene Description Fas (TNF receptor superfamily, member 6)

Omim ID [134637 601859](#)

Gene Ontology [Hyperlink](#)

Gene Summary

The protein encoded by this gene is a member of the TNF-receptor superfamily. This receptor contains a death domain. It has been shown to play a central role in the physiological regulation of programmed cell death, and has been implicated in the pathogenesis of various malignancies and diseases of the immune system. The interaction of this receptor with its ligand allows the formation of a death-inducing signaling complex that includes Fas-associated death domain protein (FADD), caspase 8, and caspase 10. The autoproteolytic processing of the caspases in the complex triggers a downstream caspase cascade, and leads to apoptosis. This receptor has been also shown to activate NF-kappaB, MAPK3/ERK1, and MAPK8/JNK, and is found to be involved in transducing the proliferating signals in normal diploid fibroblast and T cells. At least eight alternatively spliced transcript variants have been described, some of which are candidates for nonsense-mediated decay (NMD). The isoforms lacking the transmembrane domain may negatively regulate the apoptosis mediated by the full length isoform. [provided by RefSeq]
