

RET polyclonal antibody

Catalog # PAB30799 Size 100 uL

Applications

Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Immunohistochemical staining (Formalin-fixed paraffin-embedded sections) of human colon with RET polyclonal antibody (Cat # PAB30799) shows strong cytoplasmic and membranous positivity in glandular cells.

Immunofluorescence

Immunofluorescent staining of U-251 MG with RET polyclonal antibody (Cat # PAB30799) (Green) shows positivity in cytoplasm and vesicles.

Specification

Product Description	Rabbit polyclonal antibody raised against partial recombinant human RET.
Immunogen	Recombinant protein corresponding to human RET.
Sequence	NQVSVDAFKILEDPKWEFPRKNLVLGKTLGEGEFGKVVKATAFHLKGRAGYTTVAVKMLKENAS PSELRDLLSEFNVLKQVNHPHVIKLYGACSQDGPLLLIVEYAKYGSRLRGFLRESRKVGPGYLGSGG SRNSSSLDHPDERALTM
Host	Rabbit

Reactivity	Human
Form	Liquid
Purification	Antigen affinity purification
Isotype	IgG
Recommend Usage	Immunofluorescence (1-4 ug/mL) Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections) (1:200-1:500) The optimal working dilution should be determined by the end user.
Storage Buffer	In PBS, pH 7.2 (40% glycerol, 0.02% sodium azide).
Storage Instruction	Store at 4°C. For long term storage store at -20°C. Aliquot to avoid repeated freezing and thawing.
Note	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Applications

- Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Immunohistochemical staining (Formalin-fixed paraffin-embedded sections) of human colon with RET polyclonal antibody (Cat # PAB30799) shows strong cytoplasmic and membranous positivity in glandular cells.

- Immunofluorescence

Immunofluorescent staining of U-251 MG with RET polyclonal antibody (Cat # PAB30799) (Green) shows positivity in cytoplasm and vesicles.

Gene Info — RET

Entrez GeneID	5979
Protein Accession#	P07949
Gene Name	RET
Gene Alias	CDHF12, HSCR1, MEN2A, MEN2B, MTC1, PTC, RET-ELE1, RET51
Gene Description	ret proto-oncogene
Omim ID	142623 155240 162300 164761 171300 171400 209880
Gene Ontology	Hyperlink

Gene Summary

This gene, a member of the cadherin superfamily, encodes one of the receptor tyrosine kinases, which are cell-surface molecules that transduce signals for cell growth and differentiation. This gene plays a crucial role in neural crest development, and it can undergo oncogenic activation in vivo and in vitro by cytogenetic rearrangement. Mutations in this gene are associated with the disorders multiple endocrine neoplasia, type IIA, multiple endocrine neoplasia, type IIB, Hirschsprung disease, and medullary thyroid carcinoma. Two transcript variants encoding different isoforms have been found for this gene. Additional transcript variants have been described but their biological validity has not been confirmed. [provided by RefSeq]

Other Designations

RET transforming sequence|cadherin family member 12|hydroxyaryl-protein kinase|oncogene RET|receptor tyrosine kinase|ret proto-oncogene (multiple endocrine neoplasia and medullary thyroid carcinoma 1, Hirschsprung disease)
