

# HNRNPK polyclonal antibody

Catalog # PAB31391      Size 100 uL

## Applications

### Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Immunohistochemical staining (Formalin-fixed paraffin-embedded sections) of human oral mucosa with HNRNPK polyclonal antibody (Cat # PAB31391) shows strong nuclear positivity in squamous epithelial cells.

## Specification

<b>Product Description</b>	Rabbit polyclonal antibody raised against partial recombinant human HNRNPK.
<b>Immunogen</b>	Recombinant protein corresponding to human HNRNPK.
<b>Sequence</b>	TEQPEETFPNTEETNGEFGKRPAEDMEEEQAFKRSRNTDEMVELRILLQSKNAGAVIGKGGKNIKA LRTDYNASVS
<b>Host</b>	Rabbit
<b>Reactivity</b>	Human
<b>Form</b>	Liquid
<b>Purification</b>	Antigen affinity purification
<b>Isotype</b>	IgG
<b>Recommend Usage</b>	Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections) (1:200-1:500) The optimal working dilution should be determined by the end user.
<b>Storage Buffer</b>	In PBS, pH 7.2 (40% glycerol, 0.02% sodium azide).

**Storage Instruction**

Store at 4°C. For long term storage store at -20°C.  
Aliquot to avoid repeated freezing and thawing.

**Note**

This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

## Applications

- Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Immunohistochemical staining (Formalin-fixed paraffin-embedded sections) of human oral mucosa with HNRNPK polyclonal antibody (Cat # PAB31391) shows strong nuclear positivity in squamous epithelial cells.

## Gene Info — HNRNPK

**Entrez GeneID**[3190](#)**Protein Accession#**[P61978](#)**Gene Name**

HNRNPK

**Gene Alias**

CSBP, FLJ41122, HNRPK, TUNP

**Gene Description**

heterogeneous nuclear ribonucleoprotein K

**Omim ID**[600712](#)**Gene Ontology**[Hyperlink](#)**Gene Summary**

This gene belongs to the subfamily of ubiquitously expressed heterogeneous nuclear ribonucleoproteins (hnRNPs). The hnRNPs are RNA binding proteins and they complex with heterogeneous nuclear RNA (hnRNA). These proteins are associated with pre-mRNAs in the nucleus and appear to influence pre-mRNA processing and other aspects of mRNA metabolism and transport. While all of the hnRNPs are present in the nucleus, some seem to shuttle between the nucleus and the cytoplasm. The hnRNP proteins have distinct nucleic acid binding properties. The protein encoded by this gene is located in the nucleoplasm and has three repeats of KH domains that binds to RNAs. It is distinct among other hnRNP proteins in its binding preference; it binds tenaciously to poly(C). This protein is also thought to have a role during cell cycle progression. Several alternatively spliced transcript variants have been described for this gene, however, not all of them are fully characterized. [provided by RefSeq]
