

# ATF2 polyclonal antibody

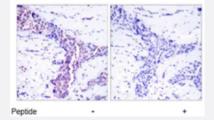

Catalog # PAB5255 Size 100 ug

## **Applications**

#### Western Blot (Cell lysate)

Western blot analysis of extract from LoVo cells using ATF2 polyclonal antibody (Cat # PAB5255).

# Immunohistochemistry (Formalin/PFA-fixed paraffinembedded sections)

Immunohistochemical analysis of paraffin-embedded human breast carcinoma tissue using ATF2 polyclonal antibody (Cat # PAB5255).

Specification	
Product Description	Rabbit polyclonal antibody raised against synthetic peptide of ATF2.
Immunogen	A synthetic peptide corresponding to residues surrounding T73/T55 of human ATF2.
Host	Rabbit
Reactivity	Human, Mouse, Rat
Form	Liquid
Quality Control Testing	Antibody Reactive Against Synthetic Peptide.

#### **Product Information**

Recommend Usage	Immunohistochemistry (1:50-1:100) Western Blot (1:500-1:1000) The optimal working dilution should be determined by the end user.
Storage Buffer	In PBS, 150 mM NaCl, pH 7.4 (50% glycerol, 0.02% sodium azide)
Storage Instruction	Store at -20°C. Aliquot to avoid repeated freezing and thawing.
Note	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which shoul d be handled by trained staff only.

# Applications

Western Blot (Cell lysate)

Western blot analysis of extract from LoVo cells using ATF2 polyclonal antibody (Cat # PAB5255).

Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Immunohistochemical analysis of paraffin-embedded human breast carcinoma tissue using ATF2 polyclonal antibody (Cat # PAB5255) .

Gene Info — ATF2	
Entrez GenelD	<u>1386</u>
Gene Name	ATF2
Gene Alias	CRE-BP1, CREB2, HB16, MGC111558, TREB7
Gene Description	activating transcription factor 2
Omim ID	<u>123811</u>
Gene Ontology	<u>Hyperlink</u>
Gene Summary	This gene encodes a transcription factor that is a member of the leucine zipper family of DNA bin ding proteins. This protein binds to the cAMP-responsive element (CRE), an octameric palindrom e. The protein forms a homodimer or heterodimer with c-Jun and stimulates CRE-dependent tran scription. The protein is also a histone acetyltransferase (HAT) that specifically acetylates histone s H2B and H4 in vitro; thus it may represent a class of sequence-specific factors that activate tran scription by direct effects on chromatin components. Additional transcript variants have been iden tified but their biological validity has not been determined. [provided by RefSeq
Other Designations	OTTHUMP00000163262 activating transcription factor 2 splice variant ATF2-var2 cAMP respons ive element binding protein 2, formerly
