

INHBB polyclonal antibody

Catalog # PAB5410 Size 100 ug

Specification

Product Description	Rabbit polyclonal antibody raised against synthetic peptide of INHBB.
Immunogen	A synthetic peptide corresponding to N-terminus of human INHBB.
Host	Rabbit
Reactivity	Chicken, Human, Mouse, Pig, Rat
Form	Liquid
Quality Control Testing	Antibody Reactive Against Synthetic Peptide.
Recommend Usage	The optimal working dilution should be determined by the end user.
Storage Buffer	In PBS, pH 7.2 (50% glycerol, 0.01% sodium azide)
Storage Instruction	Store at -20°C. Aliquot to avoid repeated freezing and thawing.
Note	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Applications

- Western Blot
- Enzyme-linked Immunoabsorbent Assay

Gene Info — INHBB

Entrez GeneID	3625
Gene Name	INHBB

Gene Alias	MGC157939
Gene Description	inhibin, beta B
Omim ID	147390
Gene Ontology	Hyperlink
Gene Summary	The inhibin beta B subunit joins the alpha subunit to form a pituitary FSH secretion inhibitor. Inhibin has been shown to regulate gonadal stromal cell proliferation negatively and to have tumour-suppressor activity. In addition, serum levels of inhibin have been shown to reflect the size of granulosa-cell tumors and can therefore be used as a marker for primary as well as recurrent disease. Because expression in gonadal and various extragonadal tissues may vary severalfold in a tissue-specific fashion, it is proposed that inhibin may be both a growth/differentiation factor and a hormone. Furthermore, the beta B subunit forms a homodimer, activin B, and also joins with the beta A subunit to form a heterodimer, activin AB, both of which stimulate FSH secretion. [provided by RefSeq]
Other Designations	Inhibin, beta-2 activin AB beta polypeptide inhibin beta B subunit
