BCAR3 polyclonal antibody

Catalog # PAB6029 Size 100 ug

Applications

Western Blot (Cell lysate)

BCAR3 polyclonal antibody (Cat # PAB6029, 0.5 ug/mL) staining of mouse embryonic kidney epithelial cells lysate (15 ug protein in RIPA buffer) . Primary incubation was 1 hour. Detected by chemiluminescence.

Specification	
Product Description	Goat polyclonal antibody raised against synthetic peptide of BCAR3.
Immunogen	A synthetic peptide corresponding to human BCAR3.
Sequence	C-RKLEPPPVKQAEL
Host	Goat
Theoretical MW (kDa)	92.5
Reactivity	Mouse
Form	Liquid
Purification	Antigen affinity purification
Concentration	0.5 mg/mL
Quality Control Testing	Antibody Reactive Against Synthetic Peptide.
Recommend Usage	ELISA (1:32000) Western Blot (1 ug/mL) The optimal working dilution should be determined by the end user.

Product Information

Storage Buffer	In Tris saline, pH 7.3 (0.5% BSA, 0.02% sodium azide)
Storage Instruction	Store at -20°C. Aliquot to avoid repeated freezing and thawing.
Note	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which shoul d be handled by trained staff only.

Applications

• Western Blot (Cell lysate)

BCAR3 polyclonal antibody (Cat # PAB6029, 0.5 ug/mL) staining of mouse embryonic kidney epithelial cells lysate (15 ug protein in RIPA buffer). Primary incubation was 1 hour. Detected by chemiluminescence.

• Enzyme-linked Immunoabsorbent Assay

Gene Info — BCAR3

Entrez GenelD	<u>8412</u>
Protein Accession#	<u>NP_003558</u>
Gene Name	BCAR3
Gene Alias	KIAA0554, NSP2, SH2D3B
Gene Description	breast cancer anti-estrogen resistance 3
Omim ID	<u>604704</u>
Gene Ontology	<u>Hyperlink</u>
Gene Summary	Breast tumors are initially dependent on estrogens for growth and progression and can be inhibite d by anti-estrogens such as tamoxifen. However, breast cancers progress to become anti-estrog en resistant. Breast cancer anti-estrogen resistance gene 3 was identified in the search for genes involved in the development of estrogen resistance. The gene encodes a component of intracellul ar signal transduction that causes estrogen-independent proliferation in human breast cancer cell s. The protein contains a putative src homology 2 (SH2) domain, a hall mark of cellular tyrosine ki nase signaling molecules, and is partly homologous to the cell division cycle protein CDC48.
