

# PTPN6 (phospho Y536) polyclonal antibody

Catalog # PAB7923

Size 100 uL

## Applications

### Western Blot (Cell lysate)

Western blot analysis of human Jurkat cells treated with pervanadate (1 mM) for 30 min (lanes 1 & 2). The blot was exposed to alkaline phosphatase (lane 2) then probed with PTPN6 (phospho Y536) polyclonal antibody (Cat # PAB7923).

## Specification

<b>Product Description</b>	Rabbit polyclonal antibody raised against synthetic phosphopeptide of PTPN6.
<b>Immunogen</b>	Synthetic phosphopeptide corresponding to residues surrounding Y536 of human PTPN6.
<b>Host</b>	Rabbit
<b>Reactivity</b>	Human, Mouse, Rat
<b>Specificity</b>	The sequence is highly conserved in rat and mouse SHP1.
<b>Form</b>	Liquid
<b>Quality Control Testing</b>	Antibody Reactive Against Synthetic Peptide.
<b>Recommend Usage</b>	ELISA (1:2000) Western Blot (1:500) The optimal working dilution should be determined by the end user.
<b>Storage Buffer</b>	In PBS (50% glycerol, 1 mg/mL BSA, 0.05% sodium azide)
<b>Storage Instruction</b>	Store at -20°C. Aliquot to avoid repeated freezing and thawing.

**Note**

This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

## Applications

- Western Blot (Cell lysate)

Western blot analysis of human Jurkat cells treated with pervanadate (1 mM) for 30 min (lanes 1 & 2). The blot was exposed to alkaline phosphatase (lane 2) then probed with PTPN6 (phospho Y536) polyclonal antibody (Cat # PAB7923).

- Enzyme-linked Immunoabsorbent Assay

## Gene Info — PTPN6

Entrez GeneID	<a href="#">5777</a>
---------------	----------------------

Gene Name	PTPN6
-----------	-------

Gene Alias	HCP, HCPH, HPTP1C, PTP-1C, SH-PTP1, SHP-1, SHP-1L, SHP1
------------	---

Gene Description	protein tyrosine phosphatase, non-receptor type 6
------------------	---

Omim ID	<a href="#">176883</a>
---------	------------------------

Gene Ontology	<a href="#">Hyperlink</a>
---------------	---------------------------

Gene Summary	<p>The protein encoded by this gene is a member of the protein tyrosine phosphatase (PTP) family. PTPs are known to be signaling molecules that regulate a variety of cellular processes including cell growth, differentiation, mitotic cycle, and oncogenic transformation. N-terminal part of this PTP contains two tandem Src homolog (SH2) domains, which act as protein phospho-tyrosine binding domains, and mediate the interaction of this PTP with its substrates. This PTP is expressed primarily in hematopoietic cells, and functions as an important regulator of multiple signaling pathways in hematopoietic cells. This PTP has been shown to interact with, and dephosphorylate a wide spectrum of phospho-proteins involved in hematopoietic cell signaling. Multiple alternatively spliced variants of this gene, which encode distinct isoforms, have been reported. [provided by RefSeq</p>
