

# MAPK1 polyclonal antibody

Catalog # PAB9958

Size 100 uL

## Applications

### Western Blot (Cell lysate)

Western blot using MAPK1 polyclonal antibody (Cat # PAB9958) shows detection of MAPK1 in several whole cell lysates : HeLa (lane 1), A-431 (lane 2), and NIH/3T3 (lane 3).

Detection occurs using a 1 : 1,000 dilution of the primary antibody followed by 1 : 4,000 dilution of HRP Goat-a-Rabbit with visualization via ECL.

Film exposure was approximately 1'.

## Specification

<b>Product Description</b>	Rabbit polyclonal antibody raised against partial recombinant MAPK1.
<b>Immunogen</b>	Recombinant GST fusion protein corresponding to C-terminus of human MAPK1.
<b>Host</b>	Rabbit
<b>Reactivity</b>	Human, Mouse, Rat
<b>Form</b>	Liquid
<b>Quality Control Testing</b>	Antibody Reactive Against Recombinant Protein.
<b>Recommend Usage</b>	ELISA (1:2000-1:10000) Western Blot (1:1000-1:2000) Immunoprecipitation (5.0 ug/mg) The optimal working dilution should be determined by the end user.
<b>Storage Buffer</b>	In 20 mM KH <sub>2</sub> PO <sub>4</sub> , 150 mM NaCl, pH 7.2 (0.01% sodium azide)
<b>Storage Instruction</b>	Store at 4°C. For long term storage store at -20°C. Aliquot to avoid repeated freezing and thawing.

## Note

This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

## Applications

- Western Blot (Cell lysate)

Western blot using MAPK1 polyclonal antibody (Cat # PAB9958) shows detection of MAPK1 in several whole cell lysates : HeLa (lane 1), A-431 (lane 2), and NIH/3T3 (lane 3).

Detection occurs using a 1 : 1,000 dilution of the primary antibody followed by 1 : 4,000 dilution of HRP Goat-a-Rabbit with visualization via ECL.

Film exposure was approximately 1'.

- Immunoprecipitation

- Enzyme-linked Immunoabsorbent Assay

## Gene Info — MAPK1

Entrez GeneID [5594](#)

Protein Accession# [P28482;NP\\_002736](#)

Gene Name MAPK1

Gene Alias ERK, ERK2, ERT1, MAPK2, P42MAPK, PRKM1, PRKM2, p38, p40, p41, p41mapk

Gene Description mitogen-activated protein kinase 1

Omim ID [176948](#)

Gene Ontology [Hyperlink](#)

**Gene Summary** The protein encoded by this gene is a member of the MAP kinase family. MAP kinases, also known as extracellular signal-regulated kinases (ERKs), act as an integration point for multiple biochemical signals, and are involved in a wide variety of cellular processes such as proliferation, differentiation, transcription regulation and development. The activation of this kinase requires its phosphorylation by upstream kinases. Upon activation, this kinase translocates to the nucleus of the stimulated cells, where it phosphorylates nuclear targets. Two alternatively spliced transcript variants encoding the same protein, but differing in the UTRs, have been reported for this gene. [provided by RefSeq]

**Other Designations** OTTHUMP00000174492|extracellular signal-regulated kinase 2|extracellular signal-regulated kinase-2|mitogen-activated protein kinase 2|protein tyrosine kinase ERK2
