

#### RecomAb™

# CHGA recombinant monoclonal antibody, clone CHGA/1773R

Catalog # RAB00322 Size 100 ug

## Applications

#### Immunohistochemistry (Formalin/PFA-fixed paraffinembedded sections)

Immunohistochemical staining (Formalin-fixed paraffin-embedded sections) of human pancreas (A) and human parathyroid (B) with CHGA recombinant monoclonal antibody, clone CHGA/1773R (Cat # RAB00322).

| Specification        |  |
|----------------------|--|
| Product Description  | Rabbit recombinant monoclonal antibody raised against human CHGA.                                |
| Antibody Species     | Rabbit   |
| Immunogen            | Original antibody is raised against recombinant protein corresponding to full length human CHGA. |
| Theoretical MW (kDa) | 68-75  |
| Reactivity           | Human  |
| Form                 | Liquid   |
| Purification         | Protein A/G purification   |
| lsotype              | lgG, kappa   |

#### **Product Information**

| Recommend Usage     | Flow Cytometry (0.5-1 ug/10 <sup>6</sup> cells)<br>Immunofluorescence (1-2 ug/mL)<br>Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections) (0.25-0.5 ug/mL)<br>The optimal working dilution should be determined by the end user. |
|---------------------|--|
| Storage Buffer      | In 10 mM PBS   |
| Storage Instruction | Store at -20 to -80°C.<br>Aliquot to avoid repeated freezing and thawing.  |

## Applications

• Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Immunohistochemical staining (Formalin-fixed paraffin-embedded sections) of human pancreas (A) and human parathyroid (B) with CHGA recombinant monoclonal antibody, clone CHGA/1773R (Cat # RAB00322).

| Entrez GenelD      | <u>1113</u>   |
| Protein Accession# | <u>P10645</u>   |
| Gene Name          | CHGA  |
| Gene Alias         | CGA   |
| Gene Description   | chromogranin A (parathyroid secretory protein 1)  |
| Omim ID            | <u>118910</u>   |
| Gene Ontology      | Hyperlink   |
| Gene Summary       | The protein encoded by this gene is a member of the chromogranin/secretogranin family of neuro endocrine secretory proteins. It is found in secretory vesicles of neurons and endocrine cells. This gene product is a precursor to three biologically active peptides; vasostatin, pancreastatin, and p arastatin. These peptides act as autocrine or paracrine negative modulators of the neuroendocrin e system. Other peptides, including chromostatin, beta-granin, WE-14 and GE-25, are also derive d from the full-length protein. However, biological activities for these molecules have not been sho wn. [provided by RefSeq |

#### **Product Information**

**Other Designations** 

betagranin (N-terminal fragment of chromogranin A)|chromogranin A|parathyroid secretory protein 1
