

RecomAb™

INS recombinant monoclonal antibody, clone IRDN/1980R

Catalog # RAB00461 Size 100 ug

Applications

Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Immunohistochemical staining (Formalin-fixed paraffin-embedded sections) of human Pancreas using INS recombinant monoclonal antibody, clone IRDN/1980R.

Specification

Product Description	Rabbit recombinant monoclonal antibody raised against full length recombinant human INS.
Antibody Species	Rabbit
Immunogen	Original antibody is raised against recombinant protein corresponding to full length human INS.
Reactivity	Human
Form	Liquid
Purification	Protein A/G purification
Isotype	IgG
Recommend Usage	Immunohistochemistry (Formalin-fixed) (0.5-1 ug/mL) The optimal working dilution should be determined by the end user.
Storage Buffer	In 10 mM PBS (0.05% BSA, 0.05% sodium azide)
Storage Instruction	Store at 2 to 8°C.

Note

This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Applications

- Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Immunohistochemical staining (Formalin-fixed paraffin-embedded sections) of human Pancreas using INS recombinant monoclonal antibody, clone IRDN/1980R.

Gene Info — INS

Entrez GeneID [3630](#)

Protein Accession# [P01308](#)

Gene Name INS

Gene Alias ILPR, IRDN

Gene Description insulin

Omim ID [125850 176730](#)

Gene Ontology [Hyperlink](#)

Gene Summary After removal of the precursor signal peptide, proinsulin is post-translationally cleaved into two chains (peptide A and peptide B) that are covalently linked via two disulfide bonds. Binding of this mature form of insulin to the insulin receptor (INSR) stimulates glucose uptake. A variety of mutant alleles with changes in the coding region have been identified. There is a read-through gene, INS-IGF2, which overlaps with this gene at the 5' region and with the IGF2 gene at the 3' region. [provided by RefSeq]
