

SARS-CoV-2

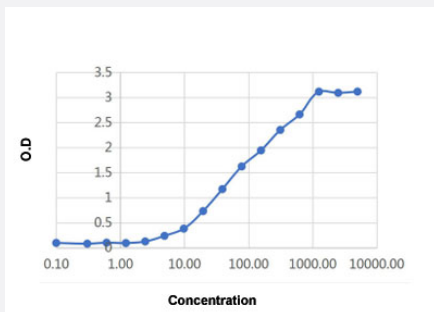

RecomAb™

SARS-CoV-2 S1 recombinant human antibody, clone S1

Catalog # RAB01034

Size 100 ug

Applications

Enzyme-linked Immunoabsorbent Assay

The indirect ELISA analysis was coated by SARS-CoV-2 S1 protein, 100 uL/cell at 5 ug/mL, was performed by loading 100 uL per well of the SARS-CoV-2 S1 recombinant human antibody, clone S1 (Cat # RAB01034) at various concentrations.

Specification

Product Description	Human recombinant monoclonal antibody raised against SARS-CoV-2 S1.
Antibody Species	Human
Source / Expression System	293
Immunogen	Original antibody is raised against Recombinant protein corresponding to SARS-CoV-2 S1.
Reactivity	SARS-CoV-2
Specificity	Binding to the spike protein S1 domain of SARS-CoV-2.
Form	Liquid
Purification	Protein A purification
Purity	>= 95% by SDS-PAGE
Isotype	IgG1

Recommend Usage	ELISA The optimal working dilution should be determined by the end user.
Storage Buffer	In PBS or Tris-Glycine Buffer
Storage Instruction	Store at 4°C for short term. For long term storage store at -20°C. Aliquot to avoid repeated freezing and thawing.

Applications

- Enzyme-linked Immunoabsorbent Assay

The indirect ELISA analysis was coated by SARS-CoV-2 S1 protein, 100 uL/cell at 5 ug/mL, was performed by loading 100 uL per well of the SARS-CoV-2 S1 recombinant human antibody, clone S1 (Cat # RAB01034) at various concentrations.
