

RecomAb™

HuAb

CD45RO/RB humanized monoclonal antibody, clone V1VHE

Catalog # RAB01125-M02J

Size 50 ug

Applications

Flow Cytometry

Flow cytometric analysis verified the effective binding of CD45RO/RB humanized monoclonal antibody, clone V1VHE (Cat # RAB01125-M02J) to activated human CD3 T cells.

Specification

Product Description	Humanized recombinant monoclonal antibody raised against CD45RO/RB.
Antibody Species	Human
Immunogen	Human CD45RO/RB recombinant protein
Reactivity	Human
Form	Liquid
Purification	Protein A sepharose
Storage Buffer	In PBS, pH 7.4
Storage Instruction	Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Applications

- Flow Cytometry

Flow cytometric analysis verified the effective binding of CD45RO/RB humanized monoclonal antibody, clone V1VHE (Cat # RAB01125-M02J) to activated human CD3 T cells.

- ELISA

Gene Info — PTPRC

Entrez GeneID [5788](#)

Gene Name PTPRC

Gene Alias B220, CD45, CD45R, GP180, LCA, LY5, T200

Gene Description protein tyrosine phosphatase, receptor type, C

Omim ID [126200](#) [151460](#) [609532](#)

Gene Ontology [Hyperlink](#)

Gene Summary

The protein encoded by this gene is a member of the protein tyrosine phosphatase (PTP) family. PTPs are known to be signaling molecules that regulate a variety of cellular processes including cell growth, differentiation, mitotic cycle, and oncogenic transformation. This PTP contains an extra cellular domain, a single transmembrane segment and two tandem intracytoplasmic catalytic domains, and thus belongs to receptor type PTP. This gene is specifically expressed in hematopoietic cells. This PTP has been shown to be an essential regulator of T- and B-cell antigen receptor signaling. It functions through either direct interaction with components of the antigen receptor complexes, or by activating various Src family kinases required for the antigen receptor signaling. This PTP also suppresses JAK kinases, and thus functions as a regulator of cytokine receptor signaling. Four alternatively spliced transcripts variants of this gene, which encode distinct isoforms, have been reported. [provided by RefSeq]
