

RecomAb™

TNFRSF10B recombinant monoclonal antibody, clone TRA-8

Catalog # RAB01154 Size 200 ug

Applications

Immunofluorescence

Immunofluorescence analysis of paraformaldehyde fixed HepG2 cells stained with the chimeric rabbit IgG version of TRA-8) at 10 ug/mL followed by Alexa Fluor 488 secondary antibody (2 ug/mL), showing cytoplasmic staining. The nuclear stain is DAPI (blue). Panels show from left-right, top-bottom, DAPI, merged channels and an isotype control. The isotype control was stained with anti-Fluorescein antibody followed by Alexa Fluor 488 secondary antibody.

Specification

Product Description	Rabbit recombinant monoclonal antibody raised against human DR5.
Antibody Species	Rabbit
Immunogen	Original antibody is raised against by immunizing BALB/c mice with a fusion protein containing the extracellular portion of human DR5 and the Fc portion of human IgG1.
Reactivity	Human
Specificity	The antibody is specific to human DR5 and does not bind other TRAIL receptors, other members of the TNF-receptor superfamily, or the murine homolog of DR5.
Form	Liquid
Purification	Protein A affinity purification
Isotype	IgG, Kappa
Recommend Usage	Immunofluorescence The optimal working dilution should be determined by the end user.

Storage Buffer

In PBS with 0.02% Proclin 300

Storage Instruction

Store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C.

Applications

● Immunofluorescence

Immunofluorescence analysis of paraformaldehyde fixed HepG2 cells stained with the chimeric rabbit IgG version of TRA-8) at 10 ug/mL followed by Alexa Fluor 488 secondary antibody (2 ug/mL), showing cytoplasmic staining. The nuclear stain is DAPI (blue). Panels show from left-right, top-bottom, DAPI, merged channels and an isotype control. The isotype control was stained with anti-Fluorescein antibody followed by Alexa Fluor 488 secondary antibody.

Gene Summary

The protein encoded by this gene is a member of the TNF-receptor superfamily, and contains an intracellular death domain. This receptor can be activated by tumor necrosis factor-related apoptosis inducing ligand (TNFSF10/TRAIL/APO-2L), and transduces an apoptosis signal. Studies with FADD-deficient mice suggested that FADD, a death domain containing adaptor protein, is required for the apoptosis mediated by this protein. Two transcript variants encoding different isoforms and one non-coding transcript have been found for this gene. [provided by RefSeq]
