

RecomAb™

PRKCB recombinant monoclonal antibody, clone R06-0C2

Catalog # RAB01221 Size 100 uL

Applications

Western Blot

Western blot analysis of PKC beta 2 in rat brain lysates using PKC beta 2 antibody. Observed band size: 77kDa.

Immunocytochemistry

Immunocytochemistry analysis of PKC beta 2 (green) in K562 using PKC beta 2 antibody, and DAPI (blue).

Specification

Product Description	Rabbit recombinant monoclonal antibody raised against human PRKCB.
Antibody Species	Rabbit
Immunogen	Original antibody is raised against synthesized peptide corresponding to human PKC beta 2.

Theoretical MW (kDa)	Calculated MW: 77 kD
Reactivity	Human
Form	Liquid
Purification	Affinity purification
Isotype	IgG
Recommend Usage	<p>Western Blot</p> <p>Immunohistochemistry (Frozen sections)</p> <p>Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)</p> <p>Immunocytochemistry</p> <p>Immunofluorescence</p> <p>Immunoprecipitation</p> <p>The optimal working dilution should be determined by the end user.</p>
Storage Buffer	In 50mM Tris-Glycine pH 7.4 (0.15M NaCl, 40% Glycerol, 0.01% Sodium azide and 0.05% BSA)
Storage Instruction	<p>Store at 4°C. For longer storage, aliquot and store at -20°C.</p> <p>Aliquot to avoid repeated freezing and thawing.</p>
Note	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Applications

- Western Blot

Western blot analysis of PKC beta 2 in rat brain lysates using PKC beta 2 antibody.Observed band size:77kDa.

- Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

- Immunohistochemistry (Frozen sections)

- Immunocytochemistry

Immunocytochemistry analysis of PKC beta 2 (green) in K562 using PKC beta 2 antibody,and DAPI(blue).

- Immunofluorescence

- Immunoprecipitation

Gene Info — PRKCB

Entrez GeneID	5579
Protein Accession#	P05771
Gene Name	PRKCB
Gene Alias	MGC41878, PKC-beta, PKCB, PRKCB1, PRKCB2
Gene Description	protein kinase C, beta
Omim ID	176970
Gene Ontology	Hyperlink
Gene Summary	<p>Protein kinase C (PKC) is a family of serine- and threonine-specific protein kinases that can be activated by calcium and second messenger diacylglycerol. PKC family members phosphorylate a wide variety of protein targets and are known to be involved in diverse cellular signaling pathways. PKC family members also serve as major receptors for phorbol esters, a class of tumor promoters. Each member of the PKC family has a specific expression profile and is believed to play a distinct role in cells. The protein encoded by this gene is one of the PKC family members. This protein kinase has been reported to be involved in many different cellular functions, such as B cell activation, apoptosis induction, endothelial cell proliferation, and intestinal sugar absorption. Studies in mice also suggest that this kinase may also regulate neuronal functions and correlate fear-induced conflict behavior after stress. Alternatively spliced transcript variants encoding distinct isoforms have been reported. [provided by RefSeq]</p>
Other Designations	protein kinase C, beta 1 polypeptide
