

RecomAb™

AT1 recombinant monoclonal antibody

Catalog # RAB02412 Size 100 uL

Applications

Western Blot (Cell lysate)

Western blot analysis of HepG2 (A) whole cell lysates with AT1 recombinant monoclonal antibody (Cat # RAB02412).

Specification

Product Description	Rabbit recombinant monoclonal antibody raised against recombinant AT1.
Antibody Species	Rabbit
Immunogen	Original antibody is raised against a synthetic peptide of human Angiotensin II Type 1 Receptor.
Theoretical MW (kDa)	41
Reactivity	Human
Specificity	Recognizes endogenous levels of AT1 protein.
Form	Liquid
Purification	Immunogen affinity chromatography
Isotype	IgG
Recommend Usage	Western Blot (1:500-1:1000)
Storage Buffer	In 50mM Tris-Glycine, pH 7.4 (0.15M NaCl, 50% Glycerol, 0.01% Sodium azide and 0.05% BSA)

Storage Instruction

Store at 4°C short term.
Aliquot and store at -20°C long term.
Avoid freeze-thaw cycles.

Note

This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Applications

- Western Blot (Cell lysate)

Western blot analysis of HepG2 (A) whole cell lysates with AT1 recombinant monoclonal antibody (Cat # RAB02412).

Gene Summary

Angiotensin II is a potent vasopressor hormone and a primary regulator of aldosterone secretion. It is an important effector controlling blood pressure and volume in the cardiovascular system. It acts through at least two types of receptors. This gene encodes the type 1 receptor which is thought to mediate the major cardiovascular effects of angiotensin II. This gene may play a role in the generation of reperfusion arrhythmias following restoration of blood flow to ischemic or infarcted myocardium. It was previously thought that a related gene, denoted as AGTR1B, existed; however, it is now believed that there is only one type 1 receptor gene in humans. At least five transcript variants have been described for this gene. Additional variants have been described but their full-length nature has not been determined. The entire coding sequence is contained in the terminal exon and is present in all transcript variants. [provided by RefSeq]
