

RecomAb™

NR3C1 recombinant monoclonal antibody

Catalog # RAB02504 Size 100 uL

Applications

Western Blot

Western blot analysis of rat skeletal muscle (A), K562 (B), NIH3T3 (C), HeLa (D) whole cell lysates with Glucocorticoid Receptor recombinant monoclonal antibody (Cat # RAB02504).

Immunofluorescence

Immunofluorescent analysis of HeLa cells with Glucocorticoid Receptor recombinant monoclonal antibody (Cat # RAB02504). Formalin-fixed cells were permeabilized with 0.1% Triton X-100 in TBS for 5-10 minutes and blocked with 3% BSA-PBS for 30 minutes at room temperature. Cells were probed with the primary antibody in 3% BSA-PBS and incubated overnight at 4 °C in a humidified chamber. Cells were washed with PBST and incubated with a AF488-conjugated secondary antibody (green) in PBS at room temperature in the dark.

Specification

Product Description	Rabbit recombinant monoclonal antibody raised against human NR3C1.
Antibody Species	Rabbit
Immunogen	Original antibody is raised against Recombinant protein of mouse Glucocorticoid Receptor.
Theoretical MW (kDa)	70, 95
Reactivity	Human, Mouse, Rat

Specificity	Recognizes endogenous levels of Glucocorticoid Receptor protein.
Form	Liquid
Purification	Immunogen affinity chromatography
Isotype	IgG
Recommend Usage	Immunocytochemistry (1:50-1:100) Immunofluorescence (1:50-1:100) Western Blot (1:500-1:1000) The optimal working dilution should be determined by the end user.
Storage Buffer	In 50mM Tris-Glycine, pH 7.4 (0.15M NaCl, 50% Glycerol, 0.01% Sodium azide and 0.05% BSA)
Storage Instruction	Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze-thaw cycles.
Note	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Applications

- Western Blot

Western blot analysis of rat skeletal muscle (A), K562 (B), NIH3T3 (C), Hela (D) whole cell lysates with Glucocorticoid Receptor recombinant monoclonal antibody (Cat # RAB02504).

- Immunocytochemistry

- Immunofluorescence

Immunofluorescent analysis of HeLa cells with Glucocorticoid Receptor recombinant monoclonal antibody (Cat # RAB02504). Formalin-fixed cells were permeabilized with 0.1% Triton X-100 in TBS for 5-10 minutes and blocked with 3% BSA-PBS for 30 minutes at room temperature. Cells were probed with the primary antibody in 3% BSA-PBS and incubated overnight at 4 °C in a humidified chamber. Cells were washed with PBST and incubated with a AF488-conjugated secondary antibody (green) in PBS at room temperature in the dark.

Gene Info — NR3C1

Entrez GeneID	2908
Protein Accession#	P04150
Gene Name	NR3C1

Gene Alias	GCCR, GCR, GR, GRL
Gene Description	nuclear receptor subfamily 3, group C, member 1 (glucocorticoid receptor)
Omim ID	138040
Gene Ontology	Hyperlink
Gene Summary	The protein encoded by this gene is a receptor for glucocorticoids that can act as both a transcription factor and as a regulator of other transcription factors. This protein can also be found in heteromeric cytoplasmic complexes along with heat shock factors and immunophilins. The protein is typically found in the cytoplasm until it binds a ligand, which induces transport into the nucleus. Mutations in this gene are a cause of glucocorticoid resistance, or cortisol, resistance. Alternate splicing, the use of at least three different promoters, and alternate translation initiation sites result in several transcript variants encoding the same protein or different isoforms, but the full-length nature of some variants has not been determined. [provided by RefSeq]
Other Designations	nuclear receptor subfamily 3, group C, member 1
