

RecomAb™

# VCL recombinant monoclonal antibody

Catalog # RAB02556      Size 100 uL

## Applications

### Western Blot

Western blot analysis of K562 (A), rat brain (B), C6 (C), NIH3T3 (D), Hela (E) whole cell lysates with VCL recombinant monoclonal antibody (Cat # RAB02556).

### Immunofluorescence

Immunofluorescent analysis of HeLa cells with VCL recombinant monoclonal antibody (Cat # RAB02556). Formalin-fixed cells were permeabilized with 0.1% Triton X-100 in TBS for 5-10 minutes and blocked with 3% BSA-PBS for 30 minutes at room temperature. Cells were probed with the primary antibody in 3% BSA-PBS and incubated overnight at 4 °C in a humidified chamber. Cells were washed with PBST and incubated with a AF488-conjugated secondary antibody (green) in PBS at room temperature in the dark.

Gene Name	VCL
Gene Alias	CMD1W, MVCL
Gene Description	vinculin
Omim ID	<a href="#">193065 611407</a>
Gene Ontology	<a href="#">Hyperlink</a>
Gene Summary	Vinculin is a cytoskeletal protein associated with cell-cell and cell-matrix junctions, where it is thought to function as one of several interacting proteins involved in anchoring F-actin to the membrane. Defects in VCL are the cause of cardiomyopathy dilated type 1W. Dilated cardiomyopathy is a disorder characterized by ventricular dilation and impaired systolic function, resulting in congestive heart failure and arrhythmia. Multiple alternatively spliced transcript variants have been found for this gene, but the biological validity of some variants has not been determined. [provided by RefSeq]
