

RecomAb™

SLC3A2 recombinant monoclonal antibody, clone HBJ127

Catalog # RAB03363 Size 200 ug

Applications

Immunofluorescence

Immunofluorescent staining of Hela cells with SLC3A2 recombinant monoclonal antibody, clone HBJ127 (Cat # RAB03363).

Immunofluorescence analysis of paraformaldehyde Hela cells fixed on Shi-fix™ coverslips, permeabilized with 0.15% Triton stained with the chimeric mouse IgG1 version of RAB03363 at 10 ug/mL for 1h followed by Alexa Fluor® 488 secondary antibody (2 ug/mL), showing membrane staining. The nuclear stain is DAPI (blue). The isotype control was stained with an unknown specificity antibody followed by Alexa Fluor® 488 secondary antibody.

Gene Summary

This gene is a member of the solute carrier family and encodes a cell surface, transmembrane protein with an alpha amylase domain. The protein exists as the heavy chain of a heterodimer, covalently bound through di-sulfide bonds to one of several possible light chains. It associates with integrins and mediates integrin-dependent signaling related to normal cell growth and tumorigenesis. Alternate transcriptional splice variants, encoding different isoforms, have been characterized. [provided by RefSeq]
