

RecomAb™

FGB recombinant monoclonal antibody, clone 8E5

Catalog # RAB03448 Size 200 ug

Specification

Product Description	Mouse recombinant monoclonal antibody raised against human FGB.
Antibody Species	Mouse
Immunogen	Original antibody is raised against a synthetic β -fibrin peptide sequence GHRPLDKC conjugated to MB-KLH.
Reactivity	Human
Form	Liquid
Isotype	IgG1 kappa
Recommend Usage	ELISA <i>In vivo</i> Imaging The optimal working dilution should be determined by the end user.
Storage Buffer	In PBS with 0.02% Proclin 300
Storage Instruction	Store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C. Aliquot to avoid repeated freezing and thawing.

Applications

- Enzyme-linked Immunoabsorbent Assay
- *In vivo* Imaging

Gene Info — FGB

Entrez GeneID [2244](#)

Gene Name	FGB
Gene Alias	MGC104327, MGC120405
Gene Description	fibrinogen beta chain
Omim ID	134830 202400
Gene Ontology	Hyperlink
Gene Summary	The protein encoded by this gene is the beta component of fibrinogen, a blood-borne glycoprotein comprised of three pairs of nonidentical polypeptide chains. Following vascular injury, fibrinogen is cleaved by thrombin to form fibrin which is the most abundant component of blood clots. In addition, various cleavage products of fibrinogen and fibrin regulate cell adhesion and spreading, display vasoconstrictor and chemotactic activities, and are mitogens for several cell types. Mutations in this gene lead to several disorders, including afibrinogenemia, dysfibrinogenemia, hypodysfibrinogenemia and thrombotic tendency. [provided by RefSeq]
Other Designations	fibrinogen, B beta polypeptide fibrinogen, beta chain
