

RecomAb™

IL16 recombinant monoclonal antibody, clone 14.1

Catalog # RAB03563 Size 200 ug

Specification

Product Description	Mouse recombinant monoclonal antibody raised against human IL16.
Antibody Species	Mouse
Immunogen	Original antibody is raised against a synthetic peptide corresponding to the predicted amino acid sequence of a hydrophilic region of IL-16.
Reactivity	Human
Form	Liquid
Isotype	IgG2a kappa
Recommend Usage	ELISA Flow Cytometry Immunohistochemistry Western Blot The optimal working dilution should be determined by the end user.
Storage Buffer	In PBS (0.02% Proclin 300)
Storage Instruction	Store at 4°C for 3 months. For long term storage, aliquot and store at -20°C. Aliquot to avoid repeated freezing and thawing.

Applications

- Western Blot
- Immunohistochemistry
- Enzyme-linked Immunoabsorbent Assay
- Flow Cytometry

Gene Info — IL16

Entrez GeneID	3603
Gene Name	IL16
Gene Alias	FLJ16806, FLJ42735, FLJ44234, HsT19289, IL-16, LCF, prIL-16
Gene Description	interleukin 16 (lymphocyte chemoattractant factor)
Omim ID	603035
Gene Ontology	Hyperlink
Gene Summary	The protein encoded by this gene is a pleiotropic cytokine that functions as a chemoattractant, a modulator of T cell activation, and an inhibitor of HIV replication. The signaling process of this cytokine is mediated by CD4. The product of this gene undergoes proteolytic processing, which is found to yield two functional proteins. The cytokine function is exclusively attributed to the secreted C-terminal peptide, while the N-terminal product may play a role in cell cycle control. Caspase 3 is reported to be involved in the proteolytic processing of this protein. Two transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq]
Other Designations	OTTHUMP00000190849 OTTHUMP00000190850 interleukin 16 lymphocyte chemoattractant factor
