

RecomAb™

IL5 recombinant monoclonal antibody, clone 2E3

Catalog # RAB03587 Size 200 ug

Applications

Flow Cytometry

Flow cytometric analysis of human peripheral blood leukocytes (PBL) with IL5 recombinant monoclonal antibody, clone 2E3 (Cat # RAB03587). Human PBL cells were fixed using 2% PFA and permeabilized with 0.5% Triton and stained with anti-Fluorescein IgG antibody (isotype control-black line) or the r version of RAB03587 (blue line) at a dilution of 1:100 for 1h at RT. After washing the bound antibody was detected using a goat anti-mouse IgG AlexaFluor® 488 antibody at a dilution of 1:1000 and cells analyzed using a FACSCanto flow-cytometer.

Specification

Product Description	Rabbit recombinant monoclonal antibody raised against human IL5.
Antibody Species	Rabbit
Immunogen	Original antibody is raised against recombinant protein corresponding to human IL5.
Reactivity	Human
Form	Liquid
Isotype	IgG
Recommend Usage	ELISA Flow Cytometry Neutralization The optimal working dilution should be determined by the end user.
Storage Buffer	In PBS (0.02% Proclin 300)

Storage Instruction

Store at 4°C for 3 months. For long term storage, aliquot and store at -20°C.
Aliquot to avoid repeated freezing and thawing.

Applications

- Enzyme-linked Immunoabsorbent Assay

- Flow Cytometry

Flow cytometric analysis of human peripheral blood leukocytes (PBL) with IL5 recombinant monoclonal antibody, clone 2E3 (Cat # RAB03587).

Human PBL cells were fixed using 2% PFA and permeabilized with 0.5% Triton and stained with anti-Fluorescein IgG antibody (isotype control-black line) or the r version of RAB03587 (blue line) at a dilution of 1:100 for 1h at RT. After washing the bound antibody was detected using a goat anti-mouse IgG AlexaFluor® 488 antibody at a dilution of 1:1000 and cells analyzed using a FACSCanto flow-cytometer.

Gene Info — IL5

Entrez GeneID [3567](#)

Gene Name IL5

Gene Alias EDF, IL-5, TRF

Gene Description interleukin 5 (colony-stimulating factor, eosinophil)

Omim ID [147850](#)

Gene Ontology [Hyperlink](#)

Gene Summary The protein encoded by this gene is a cytokine that acts as a growth and differentiation factor for both B cells and eosinophils. This cytokine is a main regulator of eosinopoiesis, eosinophil maturation and activation. The elevated production of this cytokine is reported to be related to asthma or hypereosinophilic syndromes. The receptor of this cytokine is a heterodimer, whose beta subunit is shared with the receptors for interleukine 3 (IL3) and colony stimulating factor 2 (CSF2/GM-CSF). This gene, together with those for interleukin 4 (IL4), interleukin 13 (IL13), and CSF2, form a cytokine gene cluster on chromosome 5. This cytokine, IL4, and IL13 are found to be regulated coordinately by long-range regulatory elements spread over 120 kilobases on chromosome 5q31. [provided by RefSeq]

Other Designations B cell differentiation factor [OTTHUMP00000065830]T-cell replacing factor[eosinophil differentiation factor]interleukin 5[interleukin-5]
