

RecomAb™

## Vsir recombinant monoclonal antibody, clone MH5A

Catalog # RAB03743      Size 200 ug

### Applications

#### Immunofluorescence

Immunofluorescence analysis of Vsir (green) in mouse splenocytes lysates using mouse anti-PD-1H recombinant monoclonal antibody, clone MH5A (Cat # RAB03743), and DAPI(blue).

#### Enzyme-linked Immunoabsorbent Assay

ELISA analysis of recombinant mouse VISTA-Fc fusion protein using anti-VISTA recombinant monoclonal antibody, clone MH5A (Cat # RAB03743).

### Specification

|                            |                                                                                         |
|----------------------------|-----------------------------------------------------------------------------------------|
| <b>Product Description</b> | Rabbit recombinant monoclonal antibody raised against mouse PD-1H Ig.                   |
| <b>Antibody Species</b>    | Rabbit                                                                                  |
| <b>Immunogen</b>           | Original antibody is raised against recombinant protein corresponding to mouse PD-1H Ig |
| <b>Reactivity</b>          | Mouse                                                                                   |
| <b>Form</b>                | Liquid                                                                                  |

|                     |                                                                                                                                                       |
|---------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------|
| Conjugation         | Unconjugated                                                                                                                                          |
| Concentration       | batch dependent                                                                                                                                       |
| Isotype             | IgG lambda                                                                                                                                            |
| Recommend Usage     | Blocking<br>ELISA<br>Immunofluorescence<br>Immunohistochemistry<br>Therapeutics<br>The optimal working dilution should be determined by the end user. |
| Storage Buffer      | Lyophilized from PBS with 0.02% Proclin 300                                                                                                           |
| Storage Instruction | Store at 4°C for 3 months. For long term storage store at -20°C.<br>Aliquot to avoid repeated freezing and thawing.                                   |
| Note                | For research use only.                                                                                                                                |

## Applications

- Immunohistochemistry

- Immunofluorescence

Immunofluorescence analysis of VsiR (green) in mouse splenocytes lysates using mouse anti-PD-1H recombinant monoclonal antibody, clone MH5A (Cat # RAB03743), and DAPI(blue).

- Enzyme-linked Immunoabsorbent Assay

ELISA analysis of recombinant mouse VISTA-Fc fusion protein using anti-VISTA recombinant monoclonal antibody, clone MH5A (Cat # RAB03743).

- Blocking
