

RecomAb™

VDR recombinant monoclonal antibody, clone 3C7

Catalog # RAB07432 Size 100 uL

Applications

Western Blot (Cell lysate)

Western blot analysis of MCF-7 whole cell lysate, THP-1 whole cell lysate, HL-60 whole cell lysate with VDR recombinant monoclonal antibody, clone 3C7 (Cat # RAB07432).

Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Immunohistochemical analysis of paraffin-embedded human colon cancer using VDR recombinant monoclonal antibody, clone 3C7 (Cat # RAB07432) on a Leica Bond™ system. After dewaxing and hydration, antigen retrieval was mediated by high pressure in a citrate buffer (pH 6.0). Section was blocked with 10% normal goat serum 30min at RT. Then primary antibody (1% BSA) was incubated at 4°C overnight. The primary is detected by a Goat anti-rabbit IgG polymer labeled by HRP and visualized using 0.05% DAB.

Specification

Product Description	Rabbit recombinant monoclonal antibody raised against human VDR.
Antibody Species	Rabbit
Immunogen	Original antibody is raised against a synthetic peptide corresponding to human VDR.
Theoretical MW (kDa)	Calculated MW: 49, 5
Reactivity	Human
Form	Liquid
Purification	Affinity chromatography purification
Isotype	IgG
Recommend Usage	ELISA Immunohistochemistry (1:50-1:200) Western Blot (1:500-1:5000) The optimal working dilution should be determined by the end user.
Storage Buffer	In PBS, pH7.4 (150 mM NaCl, 0.02% sodium azide and 50% glycerol)
Storage Instruction	Store at -20°C or -80°C. Aliquot to avoid repeated freezing and thawing.
Note	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Applications

- Western Blot (Cell lysate)

Western blot analysis of MCF-7 whole cell lysate, THP-1 whole cell lysate, HL-60 whole cell lysate with VDR recombinant monoclonal antibody, clone 3C7 (Cat # RAB07432).

- Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Immunohistochemical analysis of paraffin-embedded human colon cancer using VDR recombinant monoclonal antibody, clone 3C7 (Cat # RAB07432) on a Leica BondTM system. After dewaxing and hydration, antigen retrieval was mediated by high pressure in a citrate buffer (pH 6.0). Section was blocked with 10% normal goat serum 30min at RT. Then primary antibody (1% BSA) was incubated at 4°C overnight. The primary is detected by a Goat anti-rabbit IgG polymer labeled by HRP and visualized using 0.05% DAB.

- Enzyme-linked Immunoabsorbent Assay

Gene Info — VDR

Entrez GeneID [7421](#)

Protein Accession# [P11473](#)

Gene Name VDR

Gene Alias NR1I1

Gene Description vitamin D (1,25- dihydroxyvitamin D3) receptor

Omim ID [166710](#) [277440](#) [601769](#)

Gene Ontology [Hyperlink](#)

Gene Summary This gene encodes the nuclear hormone receptor for vitamin D3. This receptor also functions as a receptor for the secondary bile acid lithocholic acid. The receptor belongs to the family of trans-acting transcriptional regulatory factors and shows sequence similarity to the steroid and thyroid hormone receptors. Downstream targets of this nuclear hormone receptor are principally involved in mineral metabolism though the receptor regulates a variety of other metabolic pathways, such as those involved in the immune response and cancer. Mutations in this gene are associated with type II vitamin D-resistant rickets. A single nucleotide polymorphism in the initiation codon results in an alternate translation start site three codons downstream. Alternative splicing results in multiple transcript variants encoding the same protein. [provided by RefSeq]

Other Designations vitamin D (1,25-dihydroxyvitamin D3) receptor
