

RecomAb™

# RPS6KB1 recombinant monoclonal antibody, clone 7D4

Catalog # RAB07465 Size 100 uL

### **Applications**

#### Immunofluorescence

Immunofluorescent staining of Hela Cells with RPS6KB1 recombinant monoclonal antibody, clone 7D4 (Cat # RAB07465). The cells were fixed in 4% formaldehyde, permeated by 0.2% TritonX-100, and blocked in 10% normal Goat Serum. The cells were then incubated with the antibody overnight at 4°C. Nuclear DNA was labeled in blue with DAPI. The secondary antibody was FITC-conjugated AffiniPure Goat Anti-Rabbit IgG (H+L).

Specification	
Product Description	Rabbit recombinant monoclonal antibody raised against human RPS6KB1.
Antibody Species	Rabbit
Immunogen	Original antibody is raised against a synthetic peptide corresponding to human RPS6KB1.
Reactivity	Human
Form	Liquid
Purification	Affinity chromatography purification
Isotype	lgG
Recommend Usage	ELISA Immunofluorescence (1:20-1:200) The optimal working dilution should be determined by the end user.
Storage Buffer	In PBS, pH7.4 (150 mM NaCl, 0.02% sodium azide and 50% glycerol)
Storage Instruction	Store at -20°C or -80°C. Aliquot to avoid repeated freezing and thawing.

Note

This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Immunofluorescence

Immunofluorescent staining of Hela Cells with RPS6KB1 recombinant monoclonal antibody, clone 7D4 (Cat # RAB07465). The cells were fixed in 4% formaldehyde, permeated by 0.2% TritonX-100, and blocked in 10% normal Goat Serum. The cells were then incubated with the antibody overnight at 4°C. Nuclear DNA was labeled in blue with DAPI. The secondary antibody was FITC-conjugated AffiniPure Goat Anti-Rabbit IgG (H+L).

Enzyme-linked Immunoabsorbent Assay

s. This kinase contains 2 non-identical kinase catalytic domains and phosphorylates several resues of the S6 ribosomal protein. The kinase activity of this protein leads to an increase in protein synthesis and cell proliferation. Amplification of the region of DNA encoding this gene and overe pression of this kinase are seen in some breast cancer cell lines. Alternate translational start sit have been described and alternate transcriptional splice variants have been observed but have ot been thoroughly characterized. [provided by RefSeq	Gene Info — RPS6KB1	
Gene Name  RPS6KB1  Gene Alias  PS6K, S6K, S6K1, STK14A, p70(S6K)-alpha, p70-S6K, p70-alpha  Gene Description  ribosomal protein S6 kinase, 70kDa, polypeptide 1  Omim ID  608938  Gene Ontology  Hyperlink  Gene Summary  This gene encodes a member of the RSK (ribosomal S6 kinase) family of serine/threonine kinas. This kinase contains 2 non-identical kinase catalytic domains and phosphorylates several resues of the S6 ribosomal protein. The kinase activity of this protein leads to an increase in protein synthesis and cell proliferation. Amplification of the region of DNA encoding this gene and over a pression of this kinase are seen in some breast cancer cell lines. Alternate translational start sith have been described and alternate transcriptional splice variants have been observed but have of been thoroughly characterized. [provided by RefSeq  Other Designations  p70 S6 kinase, alpha 1 p70 S6 kinase, alpha 2 ribosomal protein S6 kinase, 70kD, polypeptide	Entrez GenelD	<u>6198</u>
Gene Description  ribosomal protein S6 kinase, 70kDa, polypeptide 1  Omim ID  608938  Gene Ontology  Hyperlink  This gene encodes a member of the RSK (ribosomal S6 kinase) family of serine/threonine kinas. This kinase contains 2 non-identical kinase catalytic domains and phosphorylates several resues of the S6 ribosomal protein. The kinase activity of this protein leads to an increase in protein synthesis and cell proliferation. Amplification of the region of DNA encoding this gene and overe pression of this kinase are seen in some breast cancer cell lines. Alternate translational start sith have been described and alternate transcriptional splice variants have been observed but have of been thoroughly characterized.
