

# FISH Hybridization Buffer (5 mL)

Catalog # U0029

Size 5 x 1 mL

## Specification

<b>Product Description</b>	FISH Hybridization Buffer is optimized for performance with FISH probes and contains dextran sulfate, formamide, and SSC (pH 7.0).
<b>Regulatory Status</b>	Please check the restriction regulation of formamide in your country. Make sure that importing products which contain formamide is approved by your local administration.
<b>Storage Instruction</b>	Store at 4°C

## Applications

- Fluorescent In Situ Hybridization (Cell)
