

## Viral Nucleic Acid Extraction Magnetic Microspheres

Catalog # U0565 Size 100 mL

Specification	
Product Description	Viral Nucleic Acid Extraction Magnetic Microspheres are polydisperse ferrimagnetic beads for nuclei c acid extraction in virus, pseudovirus particles and small fragments.
Material	SiO <sub>2</sub> /Fe <sub>3</sub> O <sub>4</sub>
Particle Size	~150 nm
Surface Group	OH
Form	Liquid
Solids	0.025
Recommend Usage	Nucleic acid extraction Purification
Dispersion Medium	DI water (trace amount of surfactant, 0.1% Proclin 300)
Storage Instruction	Store at 2-25°C. Do not freeze.

## Applications

Purification
