

AGT rabbit monoclonal antibody

Catalog # H00000183-K Size 100 ug x up to 3

Specification

Product Description	Rabbit monoclonal antibody raised against a human AGT peptide using ARM Technology.
Immunogen	A synthetic peptide of human AGT is used for rabbit immunization. Customer or Abnova will decide on the preferred peptide sequence.
Host	Rabbit
Library Construction	Non-fusion antibody library from rabbit spleen (ARM Technology).
Expression	Overexpression vector and transfection into 293H cell line.
Reactivity	Human
Purification	Protein A
Isotype	IgG
Quality Control Testing	Antibody reactive against human AGT peptide by ELISA and mammalian transfected lysate by Western Blot.
Storage Buffer	In 1x PBS, pH 7.4
Storage Instruction	Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.
Deliverable	Up to three rabbit IgG clones of 100 ug each will be delivered to customer.
Note	1. Customer may provide cell or tissue lysate for antibody screening. 2. Rabbit monoclonal antibody generated by ARM technology is amenable to antibody engineering including F(ab) ₂ , IgG, scFv and different Fc and non-Fc conjugates per customer request.

Applications

- Western Blot (Transfected lysate)

[Protocol Download](#)

- ELISA

Gene Info — AGT

Entrez GeneID	183
GeneBank Accession#	AGT
Gene Name	AGT
Gene Alias	ANHU, FLJ92595, FLJ97926, SERPINA8
Gene Description	angiotensinogen (serpin peptidase inhibitor, clade A, member 8)
Omim ID	106150 145500 267430
Gene Ontology	Hyperlink
Gene Summary	The protein encoded by this gene, pre-angiotensinogen or angiotensinogen precursor, is expressed in the liver and is cleaved by the enzyme renin in response to lowered blood pressure. The resulting product, angiotensin I, is then cleaved by angiotensin converting enzyme (ACE) to generate the physiologically active enzyme angiotensin II. The protein is involved in maintaining blood pressure and in the pathogenesis of essential hypertension and preeclampsia. Mutations in this gene are associated with susceptibility to essential hypertension, and can cause renal tubular dysgenesis, a severe disorder of renal tubular development. Defects in this gene have also been associated with non-familial structural atrial fibrillation, and inflammatory bowel disease. [provided by RefSeq]
Other Designations	OTTHUMP00000035878 alpha-1 antiproteinase, antitrypsin angiotensin I angiotensin II angiotensinogen pre-angiotensinogen serine (or cysteine) proteinase inhibitor
