

AHSG (Human) IP-WB Antibody Pair

Catalog # H00000197-PW1

Size 1 Set

Applications

Immunoprecipitation of AHSG transfected lysate using rabbit polyclonal anti-AHSG and Protein A Magnetic Bead ([U0007](#)), and immunoblotted with mouse polyclonal anti-AHSG.

Specification

Product Description	This IP-WB antibody pair set comes with one antibody for immunoprecipitation and another to detect the precipitated protein in western blot.
Reactivity	Human
Quality Control Testing	Immunoprecipitation-Western Blot (IP-WB) Immunoprecipitation of AHSG transfected lysate using rabbit polyclonal anti-AHSG and Protein A Magnetic Bead (U0007), and immunoblotted with mouse polyclonal anti-AHSG.
Supplied Product	Antibody pair set content: 1. Antibody pair for IP: rabbit polyclonal anti-AHSG (300 ul) 2. Antibody pair for WB: mouse polyclonal anti-AHSG (50 ul)
Storage Instruction	Store reagents of the antibody pair set at -20°C or lower. Please aliquot to avoid repeated freeze thaw cycle. Reagents should be returned to -20°C storage immediately after use.

Applications

- Immunoprecipitation-Western Blot

Gene Info — AHSG

Entrez GeneID [197](#)

Gene Name AHSG

Gene Alias A2HS, AHS, FETUA, HSGA

Gene Description alpha-2-HS-glycoprotein

Omim ID [138680](#)

Gene Ontology [Hyperlink](#)

Gene Summary Alpha2-HS glycoprotein (AHSG), a glycoprotein present in the serum, is synthesized by hepatocytes. The AHSG molecule consists of two polypeptide chains, which are both cleaved from a proprotein encoded from a single mRNA. It is involved in several functions, such as endocytosis, brain development and the formation of bone tissue. The protein is commonly present in the cortical plate of the immature cerebral cortex and bone marrow hemopoietic matrix, and it has therefore been postulated that it participates in the development of the tissues. However, its exact significance is still obscure. [provided by RefSeq]

Other Designations Alpha-2HS-glycoprotein|fetuin-A
