

APC monoclonal antibody (M01), clone 3E2

Catalog # H00000324-M01

Size 100 ug

Applications

In situ Proximity Ligation Assay (Cell)

Proximity Ligation Analysis of protein-protein interactions between JUP and APC. HeLa cells were stained with anti-JUP rabbit purified polyclonal 1:1200 and anti-APC mouse monoclonal antibody 1:50. Each red dot represents the detection of protein-protein interaction complex, and nuclei were counterstained with DAPI (blue).

Immunofluorescence

Immunofluorescence of monoclonal antibody to APC on HeLa cell . [antibody concentration 10 ug/ml]

Western Blot detection against Immunogen (36.85 KDa) .

Gene Summary	This gene encodes a tumor suppressor protein that acts as an antagonist of the Wnt signaling pathway. It is also involved in other processes including cell migration and adhesion, transcriptional activation, and apoptosis. Defects in this gene cause familial adenomatous polyposis (FAP), an autosomal dominant pre-malignant disease that usually progresses to malignancy. Disease-associated mutations tend to be clustered in a small region designated the mutation cluster region (MCR) and result in a truncated protein product. [provided by RefSeq]
Other Designations	adenomatosis polyposis coli tumor suppressor
