## CLPS (Human) IP-WB Antibody Pair

Catalog # H00001208-PW1 Size 1 Set

### Applications

Immunoprecipitation of CLPS transfected lysate using rabbit polyclonal anti-CLPS and Protein A Magnetic Bead (<u>U0007</u>), and immunoblotted with mouse polyclonal anti-CLPS.

Specification	
Product Description	This IP-WB antibody pair set comes with one antibody for immunoprecipitation and another to detect the precipitated protein in western blot.
Reactivity	Human
Quality Control Testing	Immunoprecipitation-Western Blot (IP-WB) Immunoprecipitation of CLPS transfected lysate using rabbit polyclonal anti-CLPS and Protein A Ma gnetic Bead ( <u>U0007</u> ), and immunoblotted with mouse polyclonal anti-CLPS.
Supplied Product	Antibody pair set content: 1. Antibody pair for IP: rabbit polyclonal anti-CLPS (300 ul) 2. Antibody pair for WB: mouse polyclonal anti-CLPS (50 ul)
Storage Instruction	Store reagents of the antibody pair set at -20°C or lower. Please aliquot to avoid repeated freeze tha w cycle. Reagents should be returned to -20°C storage immediately after use.

### Applications

Immunoprecipitation-Western Blot

The protein encoded by this gene is a cofactor needed by pancreatic lipase for efficient dietary lip id hydrolysis. It binds to the C-terminal, non-catalytic domain of lipase, thereby stabilizing an activ e conformation and considerably increasing the overall hydrophobic binding site. The gene produ ct allows lipase to anchor noncovalently to the surface of lipid micelles, counteracting the destabili zing influence of intestinal bile salts. This cofactor is only expressed in pancreatic acinar cells, sug gesting regulation of expression by tissue-specific elements. [provided by RefSeq
