

DNAxPab

Hard-to-Find
Antibody

ERCC2 DNAxPab

Catalog # H00002068-W01P

Size 200 ug

Specification

Product Description Rabbit polyclonal antibody raised against a full-length human ERCC2 DNA using DNAx™ Immune technology.

Technology [DNAx™ Immune](#)

Immunogen Full-length human DNA

Sequence

Host Rabbit

Reactivity Human

Purification Protein A

Quality Control Testing Antibody reactive against mammalian transfected lysate.

Storage Buffer In 1x PBS, pH 7.4

Storage Instruction Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Applications

- Western Blot (Transfected lysate)

[Protocol Download](#)

- Immunofluorescence (Transfected cell)

- Flow Cytometry (Transfected cell)

Gene Info — ERCC2

Entrez GeneID [2068](#)

GeneBank Accession# [NM_000400.2](#)

Protein Accession# [NP_000391.1](#)

Gene Name ERCC2

Gene Alias COFS2, EM9, MGC102762, MGC126218, MGC126219, TTD, XPD

Gene Description excision repair cross-complementing rodent repair deficiency, complementation group 2

Omim ID [126340](#) [278730](#) [601675](#) [610756](#)

Gene Ontology [Hyperlink](#)

Gene Summary The nucleotide excision repair pathway is a mechanism to repair damage to DNA. The protein encoded by this gene is involved in transcription-coupled nucleotide excision repair and is an integral member of the basal transcription factor BTF2/TFIIH complex. The gene product has ATP-dependent DNA helicase activity and belongs to the RAD3/XPD subfamily of helicases. Defects in this gene can result in three different disorders, the cancer-prone syndrome xeroderma pigmentosum complementation group D, trichothiodystrophy, and Cockayne syndrome. Alternatively spliced transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq]

Other Designations excision repair cross-complementing rodent repair deficiency, complementation group 2 protein|xeroderma pigmentosum complementary group D
