

FASN (Human) Matched Antibody Pair

Catalog # H00002194-AP11

Size 1 Set

Applications

Sandwich ELISA detection sensitivity ranging from 1 ng/ml to 100 ng/ml.

Specification

Product Description	This antibody pair set comes with a matched antibody pair to detect and quantify the protein level of human FASN.
Reactivity	Human
Quality Control Testing	Standard curve using recombinant protein (H00002194-P01) as an analyte. Sandwich ELISA detection sensitivity ranging from 1 ng/ml to 100 ng/ml.
Supplied Product	Antibody pair set content: 1. Capture antibody: rabbit MaxPab® affinity purified polyclonal anti-FASN (100 ug) 2. Detection antibody: mouse monoclonal anti-FASN, IgG1 Kappa (20 ug) *Reagents are sufficient for at least 1-2 x 96 well plates using recommended protocols.
Storage Instruction	Store reagents of the antibody pair set at -20°C or lower. Please aliquot to avoid repeated freeze thaw cycle. Reagents should be returned to -20°C storage immediately after use.

Applications

- ELISA Pair (Recombinant protein)

Gene Info — FASN

Entrez GeneID [2194](#)**Gene Name** FASN**Gene Alias** FAS, MGC14367, MGC15706, OA-519, SDR27X1**Gene Description** fatty acid synthase**Omim ID** [600212](#)**Gene Ontology** [Hyperlink](#)

Gene Summary The enzyme encoded by this gene is a multifunctional protein. Its main function is to catalyze the synthesis of palmitate from acetyl-CoA and malonyl-CoA, in the presence of NADPH, into long-chain saturated fatty acids. In some cancer cell lines, this protein has been found to be fused with estrogen receptor-alpha (ER-alpha), in which the N-terminus of FAS is fused in-frame with the C-terminus of ER-alpha. [provided by RefSeq]

Other Designations short chain dehydrogenase/reductase family 27X, member 1
