

GCH1 monoclonal antibody (M01), clone 4A12

Catalog # H00002643-M01

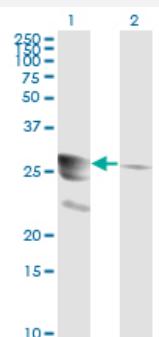

Size 100 ug

Applications

Western Blot (Cell lysate)

GCH1 monoclonal antibody (M01), clone 4A12 Western Blot analysis of GCH1 expression in IMR-32 (Cat # L008V1).

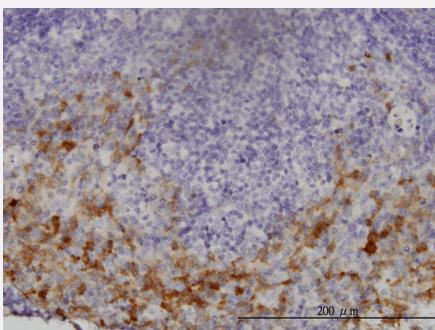

Western Blot (Transfected lysate)

Western Blot analysis of GCH1 expression in transfected 293T cell line by GCH1 monoclonal antibody (M01), clone 4A12.

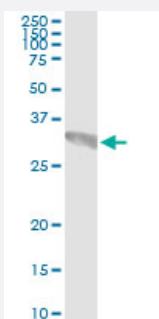

Lane 1: GCH1 transfected lysate(27.9 KDa).

Lane 2: Non-transfected lysate.

Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

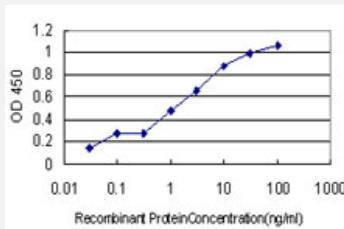

Immunoperoxidase of monoclonal antibody to GCH1 on formalin-fixed paraffin-embedded human lymph node. [antibody concentration 3 ug/ml]

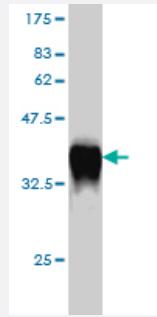

Immunoprecipitation

Immunoprecipitation of GCH1 transfected lysate using anti-GCH1 monoclonal antibody and Protein A Magnetic Bead, and immunoblotted with GCH1 MaxPab rabbit polyclonal antibody.

Sandwich ELISA (Recombinant protein)

Detection limit for recombinant GST tagged GCH1 is approximately 0.3ng/ml as a capture antibody.

Western Blot detection against Immunogen (35.53 KDa).

Specification

Product Description	Mouse monoclonal antibody raised against a partial recombinant GCH1.
Immunogen	GCH1 (NP_000152, 84 a.a. ~ 172 a.a) partial recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.
Sequence	ENPQRQGLLKTPWRAASAMQFFTKGYQETISDVNLDAIFDEDHDEMIVVKDIDMFSMCEHHLVPF VGKVKHIGYLPNKQVLGLSKLARIV
Host	Mouse
Reactivity	Human
Isotype	IgG2a Kappa
Quality Control Testing	Antibody Reactive Against Recombinant Protein. Western Blot detection against Immunogen (35.53 KDa).
Storage Buffer	In 1x PBS, pH 7.4
Storage Instruction	Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Applications

- Western Blot (Cell lysate)

GCH1 monoclonal antibody (M01), clone 4A12 Western Blot analysis of GCH1 expression in IMR-32 (Cat # L008V1).

Gene Info — GCH1

Entrez GenelID	2643
GeneBank Accession#	NM_000161
Protein Accession#	NP_000152

Gene Name	GCH1
Gene Alias	DYT14, DYT5, GCH, GTP-CH-1, GTPCH1
Gene Description	GTP cyclohydrolase 1
Omim ID	128230 233910 600225
Gene Ontology	Hyperlink
Gene Summary	This gene encodes a member of the GTP cyclohydrolase family. The encoded protein is the first and rate-limiting enzyme in tetrahydrobiopterin (BH4) biosynthesis, catalyzing the conversion of GTP into 7,8-dihydronopterin triphosphate. BH4 is an essential cofactor required by aromatic amino acid hydroxylases as well as nitric oxide synthases. Mutations in this gene are associated with malignant hyperphenylalaninemia and dopa-responsive dystonia. Several alternatively spliced transcript variants encoding different isoforms have been described; however, not all variants give rise to a functional enzyme. [provided by RefSeq]
Other Designations	guanosine 5'-triphosphate cyclohydrolase I
