

ACTL6B rabbit monoclonal antibody

Catalog # H00051412-K Size 100 ug x up to 3

| Specification | |
|-------------------------|---|
| Product Description | Rabbit monoclonal antibody raised against a human ACTL6B peptide using ARM Technology. |
| Immunogen | A synthetic peptide of human ACTL6B is used for rabbit immunization. Customer or Abnova will decide on the preferred peptide sequence. |
| Host | Rabbit |
| Library Construction | Non-fusion antibody library from rabbit spleen (<u>ARM Technology</u>). |
| Expression | Overexpression vector and transfection into 293H cell line. |
| Reactivity | Human |
| Purification | Protein A |
| Isotype | lgG |
| Quality Control Testing | Antibody reactive against human ACTL6B peptide by ELISA and mammalian transfected lysate by Western Blot. |
| Storage Buffer | In 1x PBS, pH 7.4 |
| Storage Instruction | Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing. |
| Deliverable | Up to three rabbit lgG clones of 100 ug each will be delivered to customer. |
| Note | Customer may provide cell or tissue lysate for antibody screening. Rabbit monoclonal antibody generated by ARM technology is amenable to antibody engineering in cluding F(ab)₂, lgG, scFv and different Fc and non-Fc conjugates per customer request. |

Applications

Western Blot (Transfected lysate)

Protocol Download

ELISA

| Gene Info — ACTL6B | |
|---------------------|--|
| Entrez GenelD | <u>51412</u> |
| GeneBank Accession# | ACTL6B |
| Gene Name | ACTL6B |
| Gene Alias | ACTL6, BAF53B |
| Gene Description | actin-like 6B |
| Gene Ontology | <u>Hyperlink</u> |
| Gene Summary | The protein encoded by this gene is a member of a family of actin-related proteins (ARPs) which share significant amino acid sequence identity to conventional actins. Both actins and ARPs have an actin fold, which is an ATP-binding cleft, as a common feature. The ARPs are involved in diver se cellular processes, including vesicular transport, spindle orientation, nuclear migration and chr omatin remodeling. This gene encodes a subunit of the BAF (BRG1/brm-associated factor) comp lex in mammals, which is functionally related to SWI/SNF complex in S. cerevisiae and Drosophila; the latter is thought to facilitate transcriptional activation of specific genes by antagonizing chrom atin-mediated transcriptional repression. This subunit may be involved in the regulation of genes by structural modulation of their chromatin, specifically in the brain. [provided by RefSeq |
| Other Designations | 53 kDa BRG1-associated factor B actin-like 6 actin-related protein hArpN alpha |
