

Poly-Ubiquitinated Protein (Human) ELISA Kit

Catalog # KA0112

Size 1 Kit

Applications

The standard curve is for the purpose of illustration only and should not be used to calculate unknowns. A standard curve should be generated each time the assay is performed.

Specification

Product Description

Poly-Ubiquitinated Protein (Human) ELISA Kit is designed to detect and quantify the level of total poly-ubiquitinated proteins in cell lysate. Since the amino acid sequence of ubiquitin is well conserved among mammals, this ELISA kit can be used for any mammalian cells. This assay is intended for the detection of poly-ubiquitinated proteins in cell lysate.

Suitable Sample

Cell Lysate

Sample Volume

100 μ L

Label

HRP-conjugate

Detection Method

Colorimetric

Calibration Range

1.56 to 100 U/mL

Limit of Detection

1.182 U/mL

Reactivity

Human

Regulation Status

For research use only (RUO)

Quality Control Testing

Standard curve

The standard curve is for the purpose of illustration only and should not be used to calculate unknowns. A standard curve should be generated each time the assay is performed.

Storage Instruction

Store the kit at 4°C.

Applications

- Quantification
