

Estradiol ELISA Kit

Catalog # KA0297 Size 1 Kit

Applications

The standard curve is for the purpose of illustration only and should not be used to calculate unknowns. A standard curve should be generated each time the assay is performed.

Specification

Product Description	17 beta-Estradiol ELISA Kit is a competitive immunoassay for the quantitative determination of 17 beta-Estradiol in biological and environmental samples.
Suitable Sample	Saliva and Tissue culture media
Sample Volume	100 uL
Label	AP-conjugate
Detection Method	Colorimetric
Assay Type	Quantitative
Calibration Range	29.3 to 30000 pg/mL
Limit of Detection	28.5 pg/mL
Regulation Status	For research use only (RUO)
Quality Control Testing	Standard curve The standard curve is for the purpose of illustration only and should not be used to calculate unknowns. A standard curve should be generated each time the assay is performed.
Storage Instruction	Store the kit at 4°C.

Applications

- Quantification
