

15-deoxy-Delta12,14-PGJ2 ELISA Kit

Catalog # KA0303 Size 1 Kit

Applications

The standard curve is for the purpose of illustration only and should not be used to calculate unknowns. A standard curve should be generated each time the assay is performed.

Specification

Product Description	15-deoxy-Delta12,14-PGJ2 ELISA Kit is a competitive immunoassay for the quantitative determination of 15-deoxy-Delta12,14-Prostaglandin J2 (15-d-PGJ2) in biological fluids.
Suitable Sample	Plasma, Saliva, Tissue culture media and Urine
Sample Volume	100 uL
Label	AP-conjugate
Detection Method	Colorimetric
Assay Type	Quantitative
Intra-Assay	6.23%
Inter-Assay	14.40%
Spiking Recovery	Cell Culture Supernatant: 97.40%, Plasma: 105.00%, Saliva: 94.40%, Urine: 113.90%
Calibration Range	195 to 200000 pg/mL
Limit of Detection	36.8 pg/mL
Regulation Status	For research use only (RUO)

Quality Control Testing

Standard curve

The standard curve is for the purpose of illustration only and should not be used to calculate unknowns. A standard curve should be generated each time the assay is performed.

Storage Instruction

Store all component at 4°C, except standard and conjugate at -20°C

Applications

- Quantification
