

Testosterone ELISA Kit

Catalog # KA0309 Size 1 Kit

Applications

The standard curve is for the purpose of illustration only and should not be used to calculate unknowns. A standard curve should be generated each time the assay is performed.

Specification

Product Description	Testosterone ELISA Kit is a competitive immunoassay for the quantitative determination of Testosterone in biological fluids.
Suitable Sample	Culture Supernatant, Plasma, Saliva, Serum. (Not suitable for Human Plasma and Serum)
Sample Volume	100 uL
Label	AP-conjugate
Detection Method	Colorimetric
Assay Type	Quantitative
Calibration Range	7.81 to 2000 pg/mL
Limit of Detection	5.67 pg/mL
Regulation Status	For research use only (RUO)
Quality Control Testing	Standard curve The standard curve is for the purpose of illustration only and should not be used to calculate unknowns. A standard curve should be generated each time the assay is performed.
Storage Instruction	Store the kit at 4°C.

Applications

- Quantification
