

CD14 (Human) ELISA Kit

Catalog # KA0446

Size 1 Kit

Applications

The standard curve is for the purpose of illustration only and should not be used to calculate unknowns. A standard curve should be generated each time the assay is performed.

Specification

Product Description	CD14 (Human) ELISA Kit is a sandwich enzyme immunoassay for the quantitative measurement of human CD14.
Suitable Sample	Culture Medium, Plasma, Serum
Sample Volume	100 μ L
Label	POD-conjugate
Detection Method	Colorimetric
Assay Type	Quantitative
Calibration Range	3 to 50 ng/mL
Limit of Detection	3 ng/mL (serum dilution 1:200)
Reactivity	Human
Regulation Status	For research use only (RUO)
Quality Control Testing	Standard curve The standard curve is for the purpose of illustration only and should not be used to calculate unknowns. A standard curve should be generated each time the assay is performed.

Storage Instruction

Store the kit at 4°C. Follow protocol instructions for long term storage.
Avoid repeated freezing and thawing.

Applications

- Quantification

Gene Info — CD14

Entrez GeneID	929
Gene Name	CD14
Gene Alias	-
Gene Description	CD14 molecule
Omim ID	158120
Gene Ontology	Hyperlink
Gene Summary	CD14 is a surface protein preferentially expressed on monocytes/macrophages. It binds lipopolysaccharide binding protein and recently has been shown to bind apoptotic cells. Alternative splicing results in multiple transcript variants encoding the same isoform. [provided by RefSeq]
Other Designations	CD14 antigen monocyte differentiation antigen CD14
