Thiol Detection Assay Kit

Catalog # KA1382 Size 1 Kit

Applications

The standard curve is for the purpose of illustration only and should not be used to calculate unknowns. A standard curve should be generated each time the assay is performed.

Specification

Product Description	Thiol Detection Assay Kit is used for the detection of free thiol content at excitation wavelengths between 380-390 nm and emmision wavelengths between 510-520 nm.
Suitable Sample	Cell Lysates, Plasma, Serum, Tissue Homogenates and Urine
Sample Volume	50 uL
Detection Method	Fluorometric
Regulation Status	For research use only (RUO)
Storage Instruction	Store the kit at -20°C.

Applications

- Functional Study
