THBD (Human) ELISA Kit

Catalog # KA2250 Size 1 Kit

Applications

The standard curve is for the purpose of illustration only and should not be used to calculate unknowns. A standard curve should be generated each time the assay is performed.

Specification

Product Description	THBD (Human) ELISA Kit is a sandwich enzyme immunoassay for the quantitative measurement of human THBD.
Suitable Sample	Cell Lysate, Plasma, Serum
Sample Volume	100 uL
Label	HRP-conjugated
Detection Method	Colorimetric
Assay Type	Quantitative
Calibration Range	32 to 2000 pg/mL
Reactivity	Human
Regulation Status	For research use only (RUO)
Expiration Date	Kit expiration is 3 months from date of shipment
Quality Control Testing	Standard Curve The standard curve is for the purpose of illustration only and should not be used to calculate unknowns. A standard curve should be generated each time the assay is performed.

Storage Instruction	Store the kit at 4°C.

Applications

- Quantification

Gene Info — THBD

Entrez GeneID	7056
Gene Name	THBD
Gene Alias	CD141, THRM, TM
Gene Description	thrombomodulin
Omim ID	188040
Gene Ontology	Hyperlink
Gene Summary	The protein encoded by this intronless gene is an endothelial-specific type I membrane receptor t hat binds thrombin. This binding results in the activation of protein C, which degrades clotting fact ors Va and VIIIa and reduces the amount of thrombin generated. Mutations in this gene are a caus e of thromboembolic disease, also known as inherited thrombophilia. [provided by RefSeq
Other Designations	CD141 antigen|OTTHUMP00000030415|fetomodulin

Publication Reference

- Thrombomodulin reduces α-synuclein generation and ameliorates neuropathology in a mouse model of Parkinson's disease.
