Total IgG (Human) ELISA Kit

Catalog # KA3976 Size 1 Kit

Applications

The standard curve is for the purpose of demonstration only and should not be used to calculate unknowns. A standard curve should be generated each time the assay is performed.

Specification

Product Description	Total IgG (Human) ELISA Kit is an enzyme-linked immunosorbent assay for the quantitative detection of total IgG in human biological fluids.
Suitable Sample	Plasma (ACD- or heparinized) and Serum
Sample Volume	See Sample Processing section
Label	HRP-conjugated
Detection Method	Colorimetric
Assay Type	Quantitative
Calibration Range	1 to 25 g/L
Reactivity	Human
Regulation Status	For research use only (RUO)
Quality Control Testing	Standard curve The standard curve is for the purpose of demonstration only and should not be used to calculate unkn owns. A standard curve should be generated each time the assay is performed.
Storage Instruction	Store at 2-8°C
