

Total IgA (Human) ELISA Kit

Catalog # KA3979 Size 1 Kit

Applications

The standard curve is for the purpose of demonstration only and should not be used to calculate unknowns. A standard curve should be generated each time the assay is performed.

Specification

Product Description	Total IgA (Human) ELISA Kit is an enzyme-linked immunosorbent assay for the quantitative detection of total IgA in human biological fluids.
Suitable Sample	Plasma (ACD- or heparinized) and Serum, Saliva, Urine, Cerebrospinal fluid
Sample Volume	Blood Plasma or Serum 100 uL, Saliva 10 uL, Urine 20 uL, Cerebrospinal fluid 50 uL
Label	HRP-conjugate
Detection Method	Colorimetric
Assay Type	Quantitative
Calibration Range	0.1 to 5 g/L
Limit of Detection	0.06 g/L
Reactivity	Human
Regulation Status	For research use only (RUO)
Quality Control Testing	Standard curve The standard curve is for the purpose of demonstration only and should not be used to calculate unknowns. A standard curve should be generated each time the assay is performed.

Storage Instruction

Store at 2-8°C

Applications

- Quantification
