dsDNA Quantitation Kit (Green Fluorescence)

Catalog # KA6039 Size 1 Kit

Applications

The standard curve is for the purpose of illustration only and should not be used to calculate unknowns. A standard curve should be generated each time the assay is performed.

Specification

Product Description	dsDNA Quantitation Kit (Green Fluorescence) is a fluorimetric assay used for the quantitative measurement of dsDNA.
Suitable Sample	Biological Sample (genomic DNA, viral DNA, miniprep DNA or PCR amplification products)
Sample Volume	50 uL
Detection Method	Fluorometric
Assay Type	Quantitative
Excitation	490 nm
Emission	530 nm
Calibration Range	0.027 to 20 ug/mL
Regulatory Status	For research use only (RUO)
Quality Control Testing	Standard curve The standard curve is for the purpose of illustration only and should not be used to calculate unknowns. A standard curve should be generated each time the assay is performed.
Storage Instruction	Store the kit at -20°C and avoid from light.
