TAF5L (Human) Cell-Based ELISA Kit

Catalog # KA6322 Size 1 Kit

Specification

Product Description	TAF5L (Human) Cell-Based ELISA Kit is an indirect enzyme-linked immunoassay for qualitative determination of TAF5L expression in cultured cells.
Suitable Sample	Attached Cell, Loosely Attached Cell, Suspension Cell.
Label	HRP-conjugated
Detection Method	Colorimetric
Assay Type	Qualitative
Reactivity	Human
Regulatory Status	For research use only (RUO)
Storage Instruction	Store at 4°C for six months.

Applications

- Qualitative

Gene Info — TAF5L

Entrez GeneID	27097
Protein Accession#	O75529
Gene Name	TAF5L
Gene Alias	PAF65B
Gene Description	TAF5-like RNA polymerase II, p300/CBP-associated factor (PCAF)-associated factor, 65kDa

Gene Ontology	Hyperlink
Gene Summary	The product of this gene belongs to the WD-repeat TAF5 family of proteins. This gene encodes a protein that is a component of the PCAF histone acetylase complex. The PCAF histone acetylase complex, which is composed of more than 20 polypeptides some of which are TAFs, is required f or myogenic transcription and differentiation. TAFs may participate in basal transcription, serve a s coactivators, function in promoter recognition or modify general transcription factors to facilitate complex assembly and transcription initiation. The encoded protein is structurally similar to one of the histone-like TAFs, TAF5. Alternatively spliced transcript variants encoding different isoforms h ave been identified for this gene. [provided by RefSeq
Other Designations	OTTHUMP00000037470|OTTHUMP00000037471|PCAF associated factor 65 beta|TAF5-like R NA polymerase II, p300/CBP-associated factor (PCAF)-associated factor, 65 kD

Pathway

- Basal transcription factors

Disease

- Diabetes Mellitus
- Genetic Predisposition to Disease
