

FemtoDetect™ IL2 (Human) ELISA Kit

Catalog # KA7074 Size 1 Kit

Applications

The standard curve is for the purpose of illustration only and should not be used to calculate unknowns. A standard curve should be generated each time the assay is performed.

Specification

Product Description	FemtoDetect™ IL2 (Human) ELISA Kit is a sandwich enzyme immunoassay for the quantitative measurement of Human IL-2 (Interleukin 2) in serum, plasma and other biological fluids.
Suitable Sample	serum, plasma and other biological fluids
Sample Volume	100 uL
Detection Method	Colormetric
Assay Type	Quantitative
Calibration Range	0.31-20 pg/mL
Limit of Detection	0.25 pg/mL
Specificity	This kit recognizes Human IL-2 in samples. No significant cross-reactivity or interference between Human IL-2 and analogues was observed.
Regulatory Status	For research use only (RUO)
Quality Control Testing	Standard curve The standard curve is for the purpose of illustration only and should not be used to calculate unknowns. A standard curve should be generated each time the assay is performed.

Storage Instruction

Store at 2-8°C. For long term storage store at -20°C.
Avoid repeated freezing and thawing.

Applications

- Quantification

Gene Info — IL2

Entrez GeneID [3558](#)

Gene Name IL2

Gene Alias IL-2, TCGF, lymphokine

Gene Description interleukin 2

Omim ID [147680](#)

Gene Ontology [Hyperlink](#)

Gene Summary

The protein encoded by this gene is a secreted cytokine that is important for the proliferation of T and B lymphocytes. The receptor of this cytokine is a heterotrimeric protein complex whose gamma chain is also shared by interleukin 4 (IL4) and interleukin 7 (IL7). The expression of this gene in mature thymocytes is monoallelic, which represents an unusual regulatory mode for controlling the precise expression of a single gene. The targeted disruption of a similar gene in mice leads to ulcerative colitis-like disease, which suggests an essential role of this gene in the immune response to antigenic stimuli. [provided by RefSeq]
